

# **My life experience and motivation to study**

11'th grade student  
Zharassov Aday

We started to study. My dream was to become a doctor, that is why I have chosen NIS of CBD. This is the start of my way.

Rubik's cube has  
become my first  
hobby.

I realized that I must learn one extra language to widen my range of opportunities. I have chosen Japanese then because it was the most optional choice, taking into account my favorite subject.

## Japaneses use kanji, katakana and hiragana

Chinese characters came to Japan in III century. They were little bit changed, and they are called kanji. Also they use hiragana (syllabary) in case you don't know how to write word by kanji. Also to write in computers' keyboard. Katakana (syllabary) is needed for writing strange names, names of companies etc.

ヒュイ-さん Mr. Hyui

There are 2 types of way, how to read kanji. They are on-yomi and kun-yomi. And some kanjies have more than 3 readings.  
On-yomi - first method of reading, which came from chinese. It's chinese way of reading.  
Kun-yomi - second method of reading, which is primordialially japanese. It's japanese way of reading.  
More than half of characters have to be red by on-yomi. And there are some difficulties.  
1: If there are 2 or more characters in a row, they should be red by on-yomi.  
2: If there are characters with hiragana letters before and after character, it should be red by kun-yomi.

n	w-	r-	y-	m-	h-	n-	t-	s-	k-	
シ	ウ	ラ	ヤ	マ	ハ	ナ	タ	サ	カ	ア
N	WA	RA	YA	MA	HA	NA	TA	SA	KA	A
	ヰ	リ		ミ	ヒ	ニ	チ	シ	キ	イ
	WI	RI		MI	HI	NI	CHI	SHI	KI	I
		ル	ユ	ム	フ	ヌ	ツ	ス	ク	ウ
		RU	YU	MU	FU	NU	TSU	SU	KU	U
	エ	レ		メ	ヘ	ネ	テ	セ	ケ	エ
	WE	RE		ME	HE	NE	TE	SE	KE	E
	ヲ	ロ	ヨ	モ	ホ	ノ	ト	ソ	コ	オ
	WO	RO	YO	MO	HO	NO	TO	SO	KO	O

I had several projects  
(social, scientific,  
ecological and even  
linguistic).

# IELTS, SAT, CIE - all exams and how we get prepared

The background is a dark, textured space filled with numerous thin, intersecting lines in shades of red, orange, and white. A large, dark blue, horizontally-oriented oval shape is centered in the image. Inside this oval, there are many horizontal red lines of varying thickness and opacity, creating a sense of depth and movement. The overall aesthetic is abstract and futuristic.

Olympiad among NIS

Quantum physics +  
theory of relativity = string  
theory.

SPBU Olympiad

????? PROFIT! That is my choice of  
profession and my aim is to discover  
something new in this sphere.

My aim now: to enter Tokyo University (Tokyo no Daigaku).  
I am doing all my best now (learning to write «Motivation letters»,  
learning Japanese, preparing for exams, doing voluntary work) being  
motivated by heights which everyone sitting there can achieve.

Thank you for your attention!
