MOBILE PHONE

We live in the world, where phones are used almost everywhere. The mobile phone helps us find information, talk to the person, we can have fun and learn something from them. It is very comfortable.

But the mobile phone may also have a negative affect on the human. The human can become addicted. And he will very aggressive and nervous. He will cease to live in the present, in the life. It is dangerous and terrifying.

MY CLASS

In my class all use phones. Someone withdraws, someone photographed, someone reads and someone watches the news. And we don't feel discomfort. Because despite the phone, we are talking and laughing. So we help each other on lessons, solve problems and send mems with phones. Of curse sometimes we can feel tired due to phones or due to each other. Here that we begin to replace each other. But I still love my class. We don't even dependent.
