Performed by: Chiglintsev

Alexander Nikolaevich

* *Good afternoon ladies and gentlemen! Let me introduce myself, my name is Alexander Chiglintsev!*

I represent the Ashinsky Metallurgical Plant, it is a plant with a wonderful name, so you will not find some of the plant's products anywhere in Russia and not even everywhere abroad.

In the two thousand and eleventh year, I graduated from the university and acquired the qualification of an engineer. During my studies, I acquired the necessary knowledge in my specialty, the ability to take responsibility, the ability to work with people, work experience, specific technical skills.

After graduating from university, I got a job as a mechanic at a metallurgical plant.

Now I have enrolled to study for a master's degree. I have purely professional goals. I hope that the new knowledge will allow me to achieve career growth at the enterprise. Even if I don't achieve my goals right away, the experience and knowledge I have gained still allow me to solve professional tasks in mechanical engineering.

**Thanks for your attention!*
