

## Визит Пола Джозефсона в Сургутский государственный педагогический университет

15.02.2016

14 и 15 января 2016 г. Сургутский государственный педагогический университет посетил один из крупнейших учёных в области истории науки и техники, экологической истории, соавтор книги «An Environmental History of Russia» («Экологическая история России»), профессор Колби колледжа штата Мэн (США) Пол Джозефсон.

## Список для чтения

Перечень основных научных трудов по экологической истории России на русском и английском языках, с которых, по мнению авторов сайта, лучше начинать знакомство с этой областью науки.

### Книги на русском

*Человек и природа: экологическая история.* Под общ. ред. Д. Александрова, Ф.-Й. Брюггемайера, Ю. Лайтуса. СПб.: Алетея, 2008. 349 с.

Сборник впервые предлагает вниманию отечественных читателей лучшие образцы исследований в области экологической истории — нового, быстро развивающегося направления современных исторических исследований, изучающего историю взаимоотношений человека и природы. Экологическая история возникла в 1970-е годы на волне общественного интереса к проблемам окружающей среды и охраны природы; с тех пор экологические историки питают надежду помочь экологами, вскрывая исторические причины современных экологических проблем. Но в первую очередь экологическая история — это новаторское интеллектуальное предприятие, призванное расширить границы понимания как роли природы в развитии человеческой цивилизации, так и места и роли цивилизации в жизни нашей планеты. Настоящий сборник это наглядно демонстрирует. В книгу вошли широко известные в мире работы выдающихся экологических историков США и Германии:

Джона Мак-Нипла, Уильяма Кронона, Альфреда Кросби, Дугласа Винера, Джеймса Скотта, Франца-Йозефа Брюггемайера, Клей Мак-Шейн и Джоела Тарра. Все публикуемые статьи выходят на русском языке впервые.

Йоахим Радкау. *Природа и власть. Всемирная история окружающей среды.* М.: Издательский дом Высшей школы экономики, 2014. 472 с.

Взаимоотношения человека и природы не так давно стали темой исследований профессиональных историков. Для современного специалиста экологическая история (environmental history) ассоциируется прежде всего с американской наукой. Тем интереснее представить читателю книгу «Природа и власть» Йоахима Радкау, профессора Билефельдского университета, впервые изданную на немецком языке в 2000 г. Это первая попытка немецкоговорящего автора интерпретировать всемирную историю окружающей среды. Й. Радкау в своей книге путешествует по самым разным эпохам и ландшафтам — от «водных республик» Венеции и Голландии до рисоводческих террас Китая и Бали, встречается с самыми разными фигурами — от первобытных охотников до современных специалистов по помощи странам третьего мира. Красной нитью через всю книгу проходит мысль, что вопрос окружающей среды — это всегда

вопрос власти. Смысловым центром книги является раздел «Вода, лес и власть». Не менее важна мысль, что «природа» — не только что-то внешнее по отношению к человеку, но и значительная часть его самого. История экологии, по мнению автора, — это история менталитетов. Особая ценность книги состоит в гигантском охвате использованной литературы — проанализированы не только ведущие труды известных зарубежных специалистов XX века, но и реакция на них.

Гололобов Е.И. *Человек и природа на Обь-Иртышском Севере (1917-1930): исторические корни современных экологических проблем.* Ханты-Мансийск: Редакционно-издательский отдел БУ «Институт развития образования», 2009. 222с.

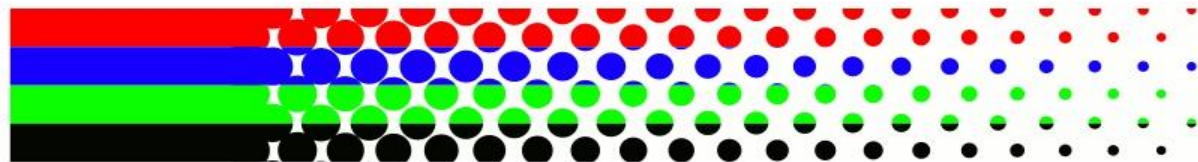

В монографии исследованы проблемы взаимодействия человека и природы на Обь-Иртышском Севере в 1917-1930 гг. Выделены исторические этапы этого взаимодействия. Показана роль природы в хозяйственно-экономической деятельности человека. Дана характеристика процесса формирования регионального природоохранного законодательства. Проанализирована система природопользования на Обь-Иртышском Севере в 1917-1930 гг. Издание предназначено для историков, географов, экологов, специалистов в сфере природопользования и всех, кто интересуется проблемами охраны окружающей среды Обь-Иртышского Севера.

Калимуллин А.М. *Историческое исследование региональных экологических проблем.* М.: Прометей, 2006. 368 с.

В условиях глобального экологического кризиса изучение последствий хозяйственной деятельности человека на

### Job: Pre-doctoral researcher in Marburg, Germany

ESEH : September 29, 2016 21:33

The Herder Institute for Historical Research on East Central Europe in Marburg, Germany invites applications for the position of junior researcher (pre-doctoral) within a project on the environmental history of the Free City of Danzig/Gdansk 1918-1939.

Deadline for applications is **10 November 2016**. For further details see the [full call for papers](#).

### CfP: "Radical Hope" Workshop

ESEH : September 7, 2016 11:29

The Rachel Carson Center is organising a workshop entitled "[Radical Hope: Inspiring Sustainability Transformations through Our Past](#)."

The workshop will be held at the Rachel Carson Center in Munich from **3 to 4 July 2017** and is convened by Carson Alumni Erika Bsumek, John Barry and RCC's director Christof Mauch.

The deadline for applications is **1 November 2016**. Further details are available on the [workshop's webpage](#).

### CfP: Rural History 2017

ESEH : September 7, 2016 11:25

[EURHO](#) (the European Rural History Organisation) will hold its third biennial conference, **Rural History 2017**, in **Leuven** (Belgium) from **11 to 14 September 2017**.

The EURHO conferences aim at promoting the exchange of research questions and results, fostering co-operation between scholars engaged in the history of rural Europe and of its interaction with other parts of the world, from ancient times up to the present. Consequently the conferences are open to all interesting proposals within a broad range of themes and covering different historical periods and regions.

The deadline for panel submissions is **15 October 2016**. That for individual papers is **31 January 2017**.

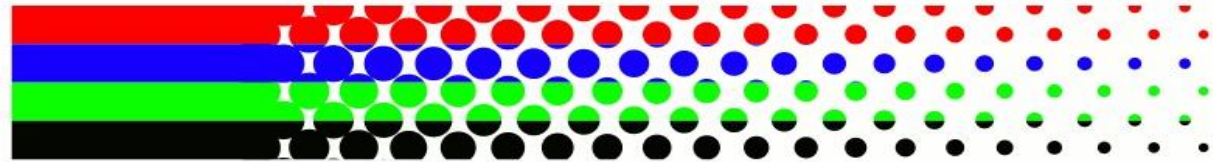

More detailed information is available on the [conference website](#).

### Fellowship: Newberry Library

ESEH : September 2, 2016 11:42

The Newberry Library's long-standing fellowship program provides outstanding scholars with the time, space, and community required to pursue innovative and ground-breaking scholarship. In addition to the Library's collections, fellows are supported by a collegial interdisciplinary community of researchers, curators, and librarians. An array of scholarly and public programs also contributes to an engaging intellectual environment. Interested individuals who wish to utilize the Newberry's collection are invited to apply for one of the many fellowship opportunities:

[Long-Term Fellowships](#) are available to postdoctoral scholars for continuous residence at the Newberry for periods of 4 to 12 months; the stipend is \$4,200 per month. Applicants must hold a PhD by the application deadline in order to be eligible. Long-Term Fellowships are intended to support individual scholarly research and promote serious intellectual exchange through active participation in

## Mission

The European Society for Environmental History promotes the study of environmental history in all academic disciplines and encourages anyone who has an interest in the field to join and become involved.

ESEH aims to:

- encourage the study of European environmental history in a comparative perspective;
- foster communication among environmental historians across Europe, and with colleagues elsewhere;
- promote the further institutional development of environmental history within secondary and tertiary education;
- promote the research and use of environmental history in academic programmes;
- strengthen the crucial link between environmental history, all policy-making, and the general public.

In order to achieve these goals ESEH has developed a range of activities since its inception in 1999. The society publishes a newsletter, ESEH Notepad, which is quarterly published in the journal *Environment and History*, published by White Horse Press in Cambridge.

Along with the [American Society for Environmental History](#), ESEH co-ordinates [H-Environment](#), an internet discussion forum that keeps subscribers posted about events and issues related to the field.

ESEH also organises biannual conferences at which scholars from all over Europe and the world gather to share their work. Since 2001 ESEH has held six successful conferences in St. Andrews, Prague, Florence, Amsterdam, Turku and Munich. In 2009 ESEH was a member of the consortium hosting the [1st World Conference of Environmental History](#), 4th to 8th August 2009 in Copenhagen. The 2015 ESEH Conference will be held in Versailles, France. Further information about past and future conferences and the summer schools the Society regularly organizes can be found on the [Events](#) page.

Finally ESEH maintains this web site to provide resources and news for scholars and others interested in environmental history.

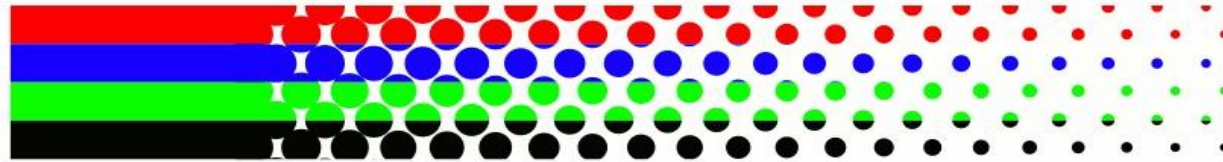

The Society aims to stimulate dialogue between humanistic scholarship, environmental science and other disciplines. It welcomes members from all disciplines and professions who share its interest in past relationships between human culture and the environment.

We invite you to explore this site and learn more about environmental history and the activities of ESEH.

### featured scholarship

Andrew Needham's book *Power Lines: Phoenix and the Making of the Modern Southwest* (Princeton University Press, 2015) explains how inexpensive electricity became a requirement for modern life in Phoenix—driving assembly lines and cooling the oppressive heat. Navajo officials initially hoped energy development would improve their lands too, but as ash piles marked their landscape, air pollution filled the skies, and almost half of Navajo households remained without electricity, many Navajos came to view power lines as a sign of their subordination in the Southwest. Drawing together urban, environmental, and American Indian history, Needham demonstrates how power lines created unequal connections between distant landscapes and how environmental changes associated with suburbanization reached far beyond the metropolitan frontier. Needham also offers a new account of postwar inequality, arguing that residents of the metropolitan periphery suffered similar patterns of marginalization as those faced in America's inner cities. His book was selected as ASEH's best book in 2016.

### welcome

Membership includes a subscription to our excellent quarterly journal, *Environmental History*, published by Oxford University Press. We invite you to explore this website for information on our mission as well as our journal, conferences and workshops, travel grants, fellowships, teaching resources, and more.

-Kathleen A. Brosnan, ASEH President

The American Society for Environmental History increases understanding of the important role played by the environment throughout human history, from the earliest period to the crucial issues of our own time and across the world's diverse societies and ecosystems. Our membership is international and interdisciplinary. A non-profit scholarly organization, ASEH promotes research and teaching in environmental history, provides public outreach to our communities, and supports our members' professional needs.

## More about the Russian Environmental History Network / Экологическая история России

Welcome to our network of environmental historians of Russia and its neighbours. This is a place to connect with others working in the field and share information.

This network is for anyone who identifies themselves as an Environmental Historian, from any discipline, including academic staff/faculty, postgraduate/graduate students and independent scholars who have published in the field. It is maintained by the University of York ([see more](#)).

Our main focus is on the Post-Soviet space, the USSR, the Russian Empire and its predecessors.

Browse or search our member list or catch up on the latest blog posts. You don't have to be registered to access much of the content but please do sign up so that others in your field can find out more about you and your work.

### You and your research (brief description)

Before moving to York in 2012, David held posts at universities in the north of England and west of Scotland, but began his career at the University of Texas at Austin. His postgraduate studies included a year at Leningrad State University in 1985-6. He has held fellowships and visiting positions in the USA, Russia and Finland. The main focus of his research has been the rural world of the Russian Empire from the seventeenth to the twentieth centuries. Initially a social historian, he moved into environmental history over a decade ago. His work has become increasingly transnational and comparative. His research on the steppes has led him to explore parallels and connections with America's Great Plains. He has also been involved in collaborative research projects on environmental history in Britain. He is lead investigator on the Leverhulme International Network: 'Exploring Russia's Environmental History and Natural Resources', involving specialists from UK, US and Russian universities, which entails annual field trips to key locations in Russia and Ukraine.

### Key publication
