# Quickbooks Error -6177:

Solution 1: Move the company file to the local hard drive

Solution 1: Move the company file to the local hard drive

Navigate server from server to server

- Open the company file in QuickBooks Software from C Drive.
- Easily create a portable file and then save the company file in the local file.
- Close the company file.
- Restore the portable file from the C drive and save it on the server.
- Select your company file.
- Try opening the file from your server.
- If the error is not solved even after doing these steps, then you have to practice all three solutions.

# QuickBooks Error 80070057:

## Solution 1: Rename the .nd file.

- Locate the folder and open the company file.
- Search for the related .nd file of the targeted company file.
- Example: MyCompanyFileName.qbw.nd.
- Right-click on the .nd file and continue to rename this file.
- Finally with filename suffix .old.
- Example MyCompanyFileName.qbw.nd.old.
