My achievements

In elementary school, I did very well, although I was still a problem.

I won conferences and literary competitions by a huge margin.

BUT

I consider my most important achievement to be personal earnings. I have achieved many of my dreams through my own freelance work.

The skills acquired at school helped to open a mini-business

What are my most important insights after 11 years of studying at school?

1

Your class will become really friendly only at the end of training.

2

If you do not want to go to physical education, then it is better to tell the truth that you are too lazy to go, and not to look for excuses

3

Only in high school do you begin to understand the difficult humor of teachers
