

My country as I see, I know, I
perceive it.

R U S S I A

I know that I live in big country. In Russia lives about 144.5 million people. More than 190 nations live on Russian's territory.

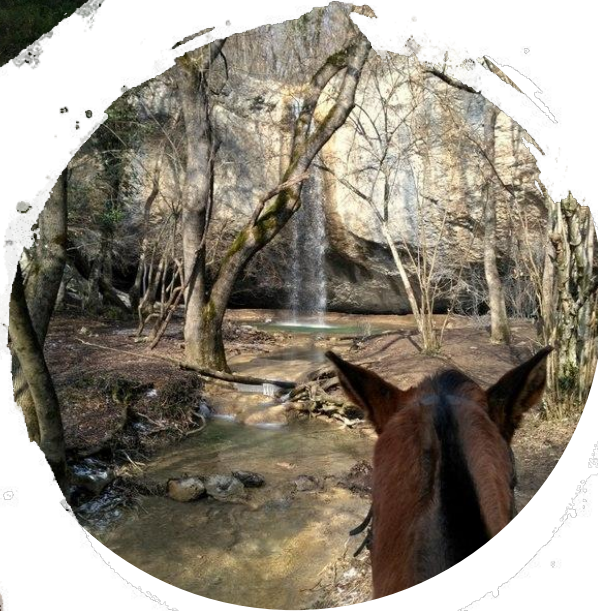

I know that politics of our country has weaknesses.

People can not always express their will, if it is contrary to state policy. People who did important work do not receive due praise.

And I know that if people are stupid or frightened to manage them easily, someone and the authorities can use it.

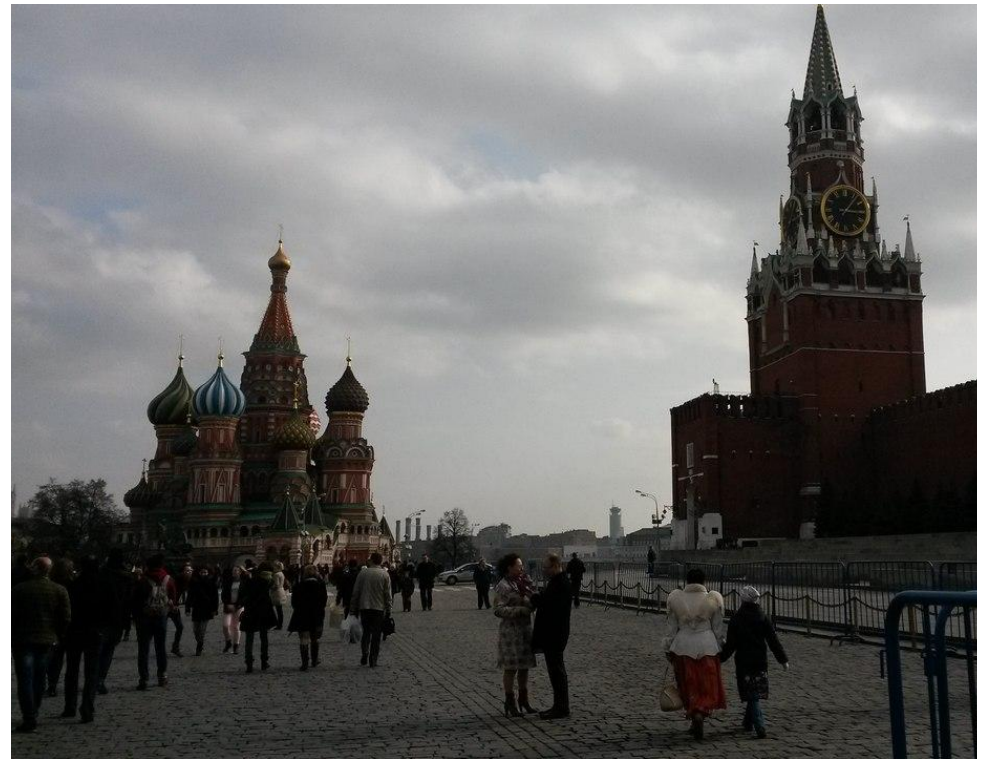

BUT I perceive that our country has positive specifications.

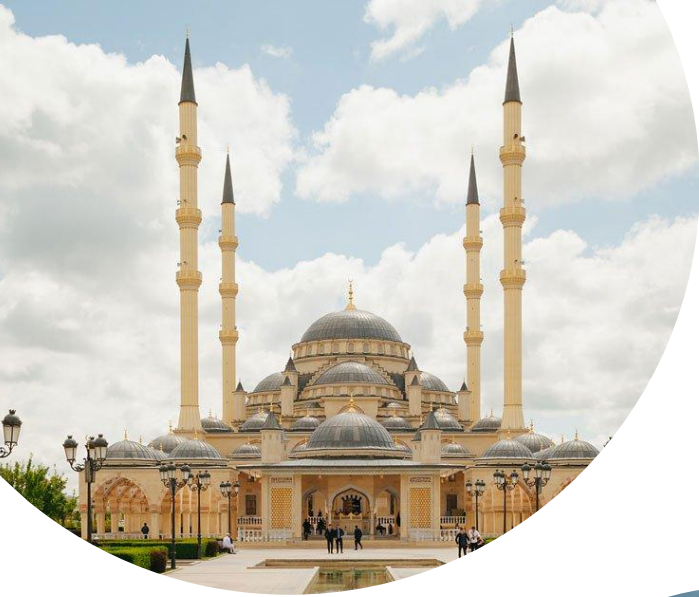

out
nature

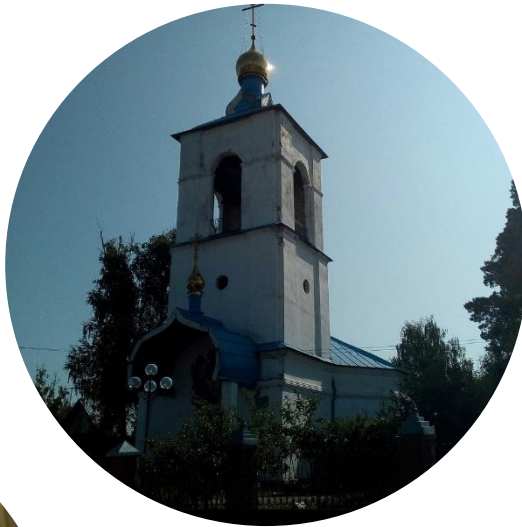

Our cities and people

Our different religions

I feel that Russia will be able to become well for
live if will be good administrator.

I believe that russian people are very kind,
patient and hopeful.
