

**I am a
school
leaver**

My name is Podgorodova Vladislava Vladslavovna. I'd like to talk about my school life. I spend a lot of time at school. This place is like my second home. I think that school years are one of the most important parts of our lives. It's the time when we get major knowledge on different subjects, certain skills and experience for living in the society.

This year I am a graduate. I am experiencing joy, anxiety and sadness. Joy, because in my life there will be something new, that a certain stage in the form of a school has already been passed. And sadness, of course, because that is what I'm used to and what I managed to fall in love with is leaving me day by day. Before, graduates seemed to be free independent people, but now it's not so. I understand that I need the support and help of my parents, because it's so scary to go into independent life.

Interesting English classes are held at our school. It was always the most difficult for me to remember the times. But despite this, English is necessary, because it is a world language and is useful in communicating with other people.

The funniest memory is when in the elementary grades we dropped a huge cupboard. It was very funny, but it's also scary that they scold.

If there was a chance to change something, then I would not change anything. I like the way everything turned out. I think everything is as it should be.

I recommend that younger students appreciate school moments and not be afraid to turn to teachers for help. The school has very understanding teachers and even if there was something incomprehensible, they will certainly help.

It is necessary to appreciate such a period in life as the school years. Even if they seem annoying and uninteresting, sometimes terrible, you will remember all the moments that were associated with this place
