угольник ...

Угол – это геометрическая фигура, образованная двумя разными лучами с общим началом.

Обозначение углов

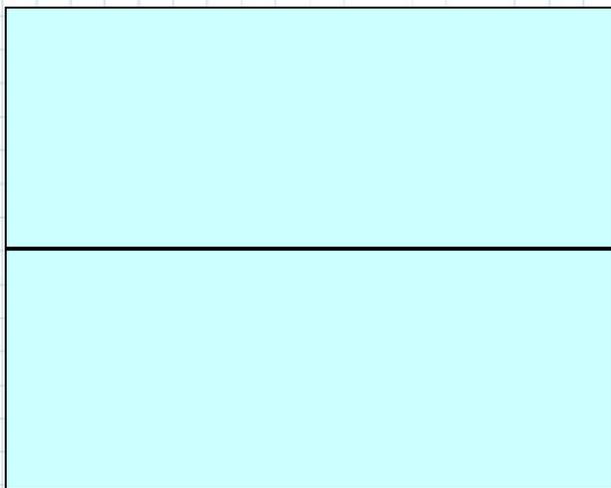

Точка **O** – вершина угла.

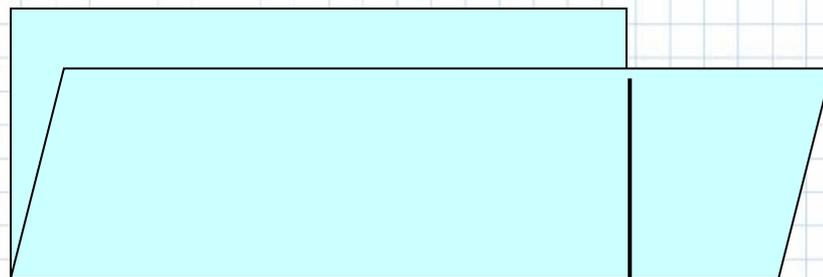

Лучи **AO** и **OB** – стороны угла.

Модель прямого угла

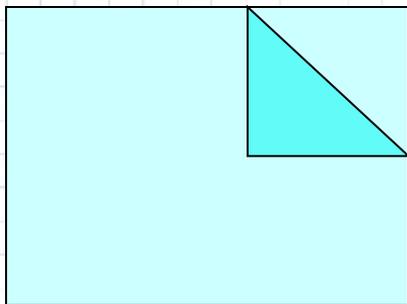

1).

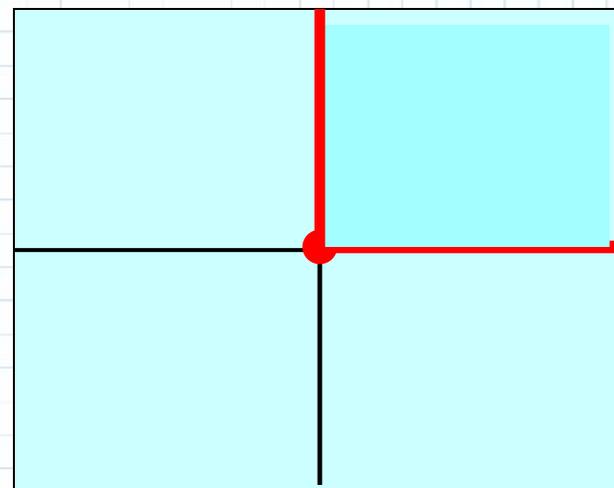

2).

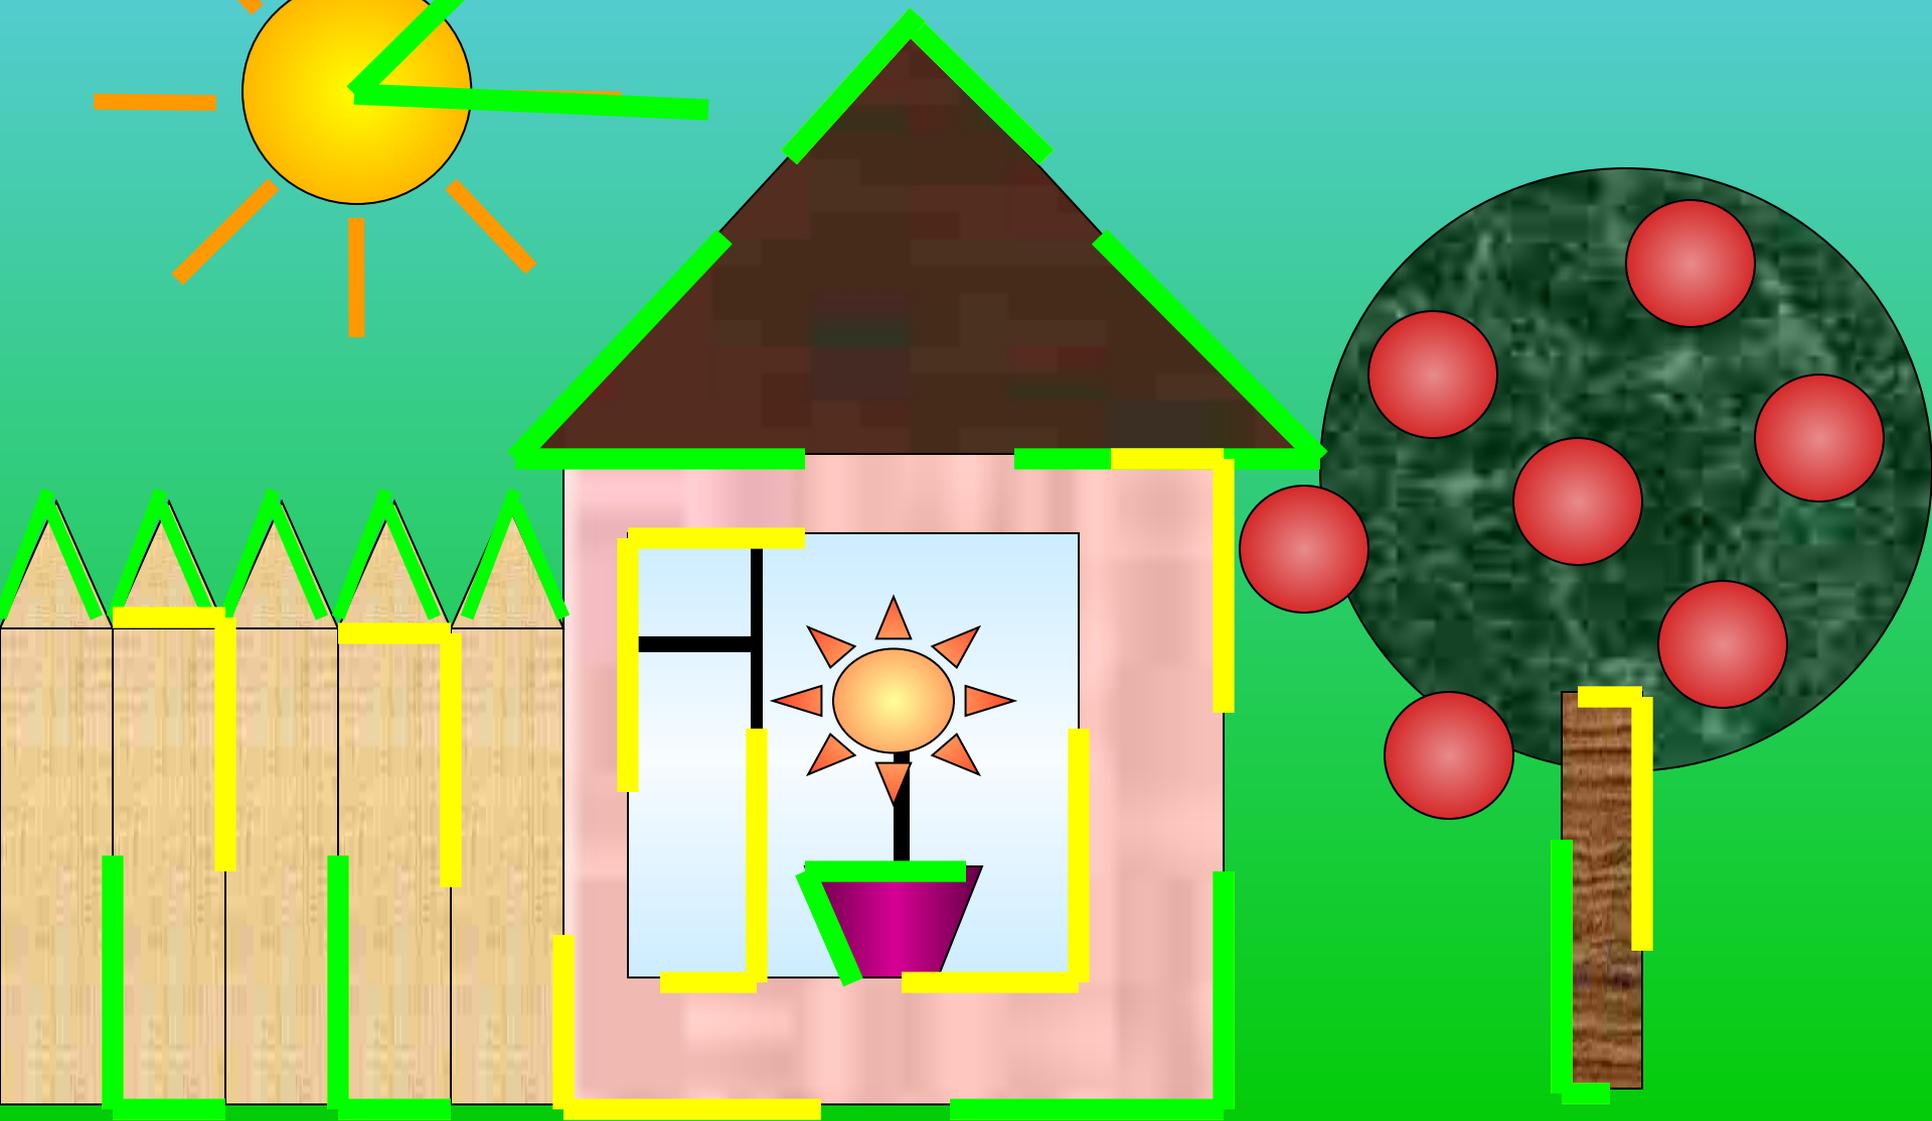

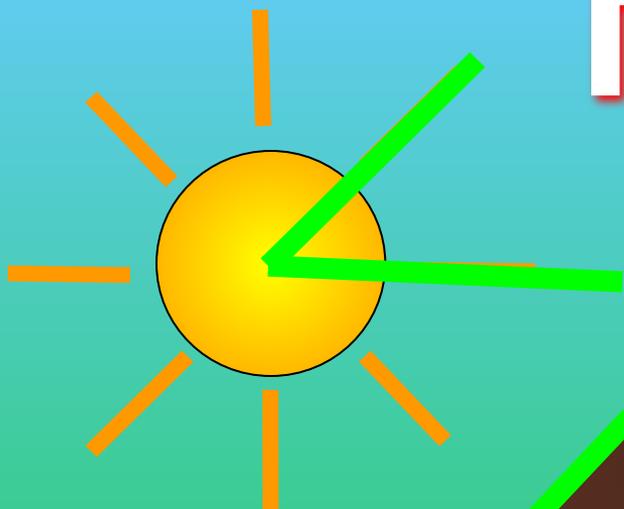

3).

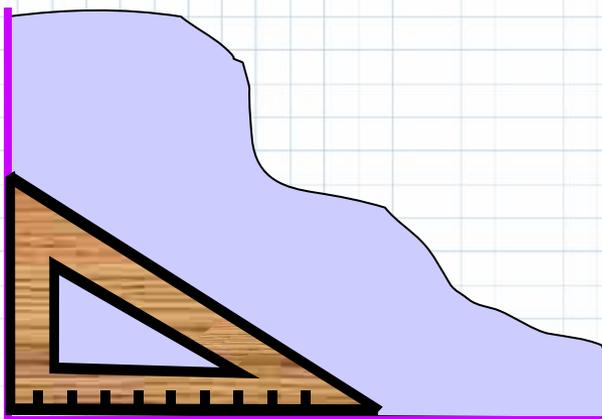

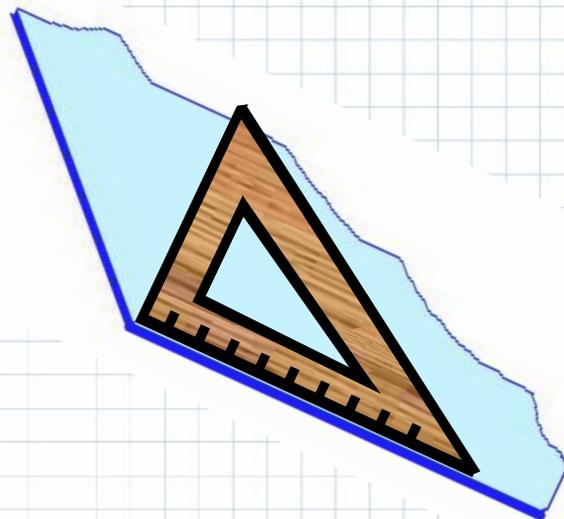

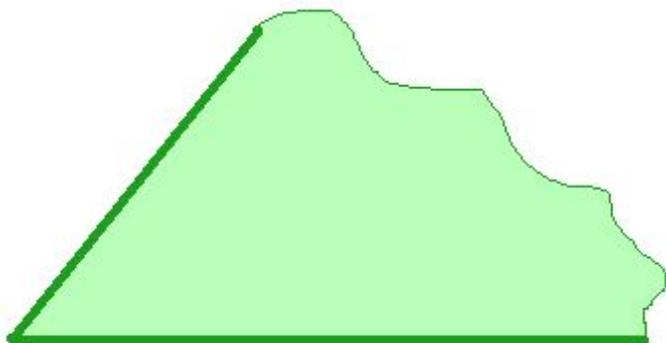

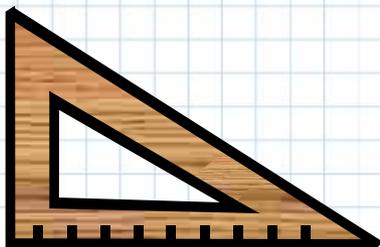

4).

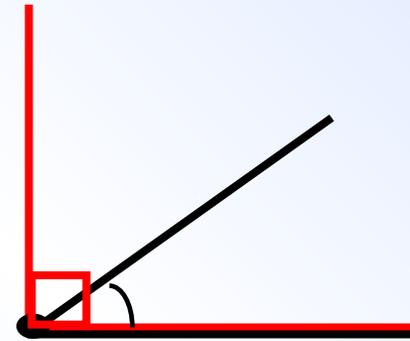

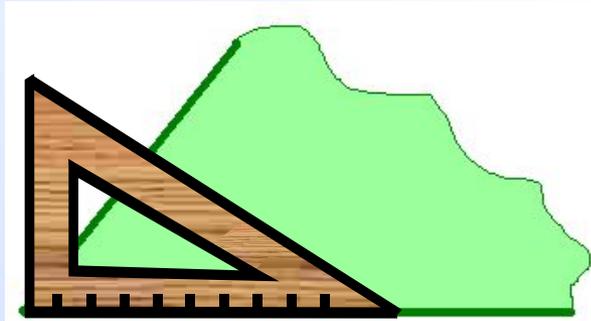

ПРЯМОУГОЛ

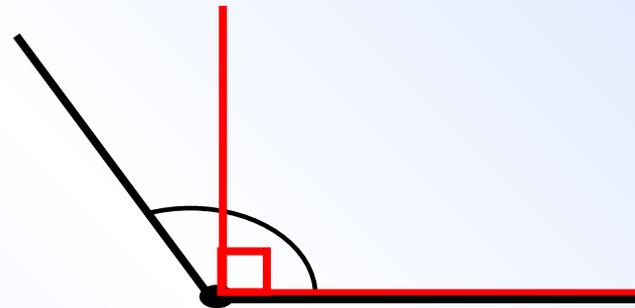

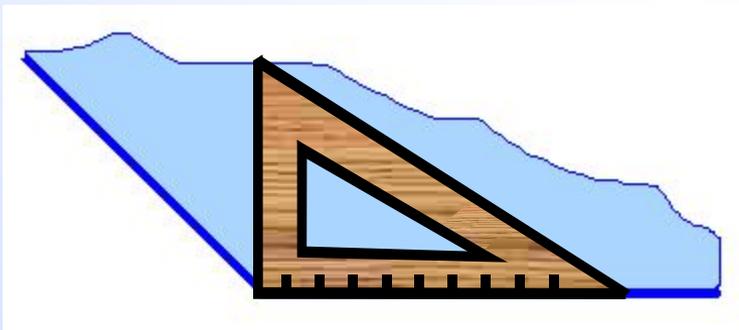

Какой угол прямой?

Острый угол – это угол, который меньше прямого.

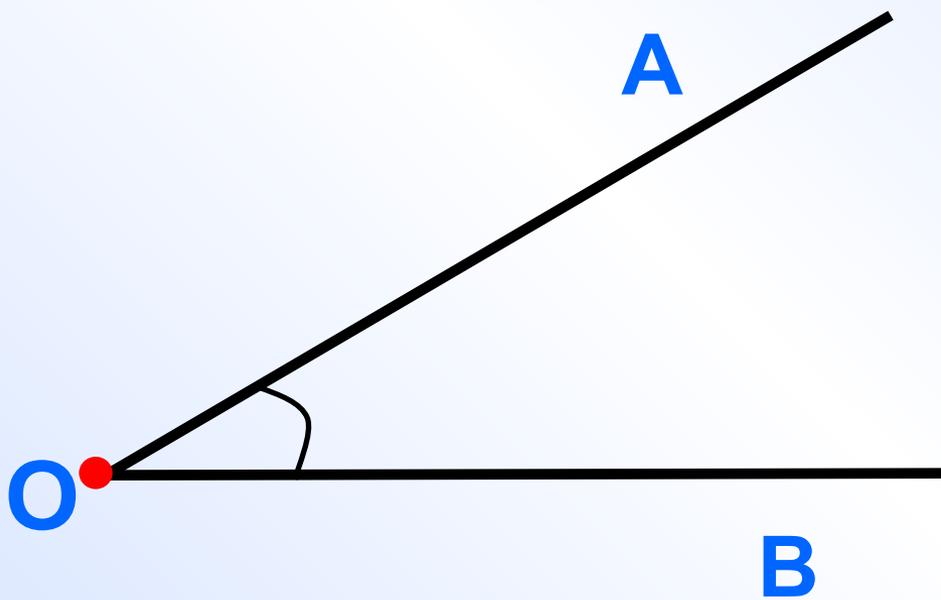

Тупой угол – это угол, который больше прямого.

Проверь себя!

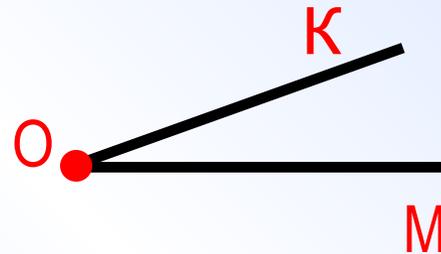

Угол – это геометрическая фигура, образованная двумя разными лучами с общим началом.

Проверь себя!

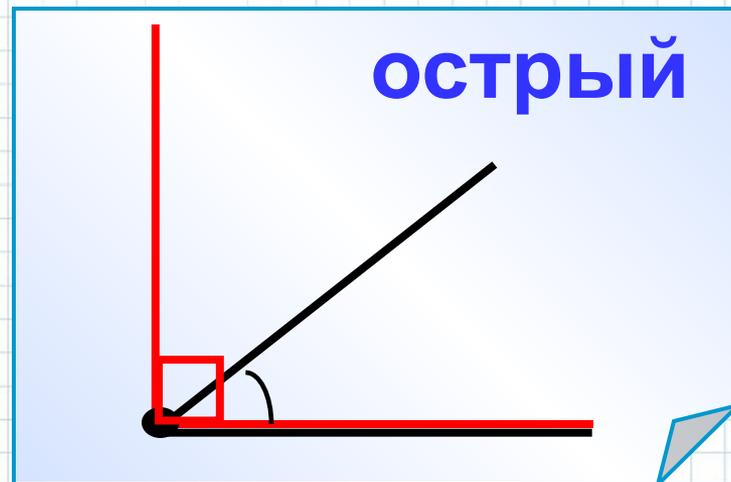

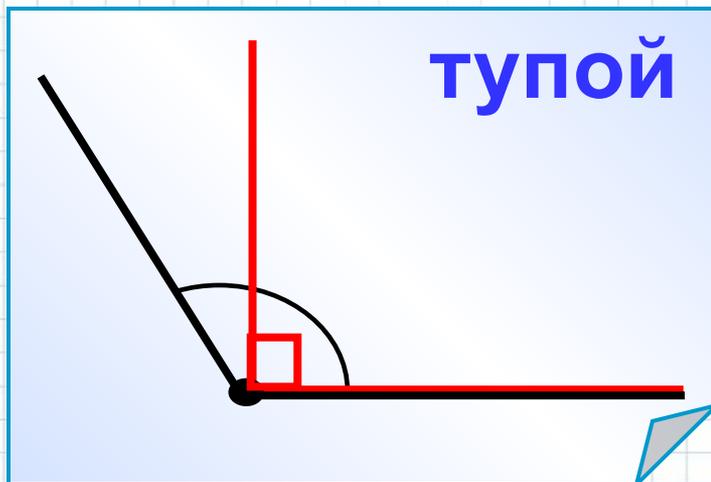

Стороны угла – это лучи.

На рисунке изображён угол КОМ

**Острый угол меньше прямого,
а тупой угол больше прямого.**

Какого вида эти углы?
