"Canadian" or "Finnish" cottages

Features of factory production

Frame houses are manufactured in industrial conditions using two main technologies:

- Classic frame
- Panel

Classic frame technology

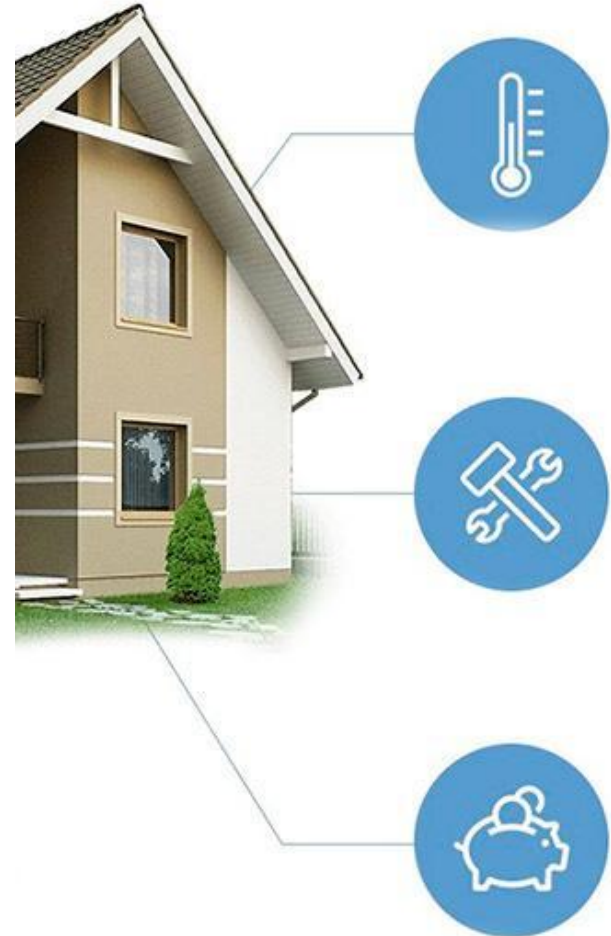

Panel technology

Advantages of a ready-made home kit

1. Production of all elements according to a specific project, taking into account its dimensions, configuration and layout;
2. Precise sizing and perfect fit while still in production;
3. Assembly by the company's specialists is not in a few weeks, but in a few days;
4. The ability to immediately move in and live;
5. No need for rough finishing, additional insulation, processing of wood from moisture and pests – all this is done at the enterprise.

Disadvantages of frame house
