Sociocultural problems

Maya Yldaeva

КТ601-10

The social, cultural and economic development of the world day by day and the rapid increase in the world population brings with it sociocultural problems.

Multiculturalism is spreading rapidly among people. Recently, with the spread of American culture as a global culture, many societies in the world have changed their culture.

Here are some recent sociocultural problems:

People's respect for each other is diminishing, they are losing their old traditions.

They have been living everything in the virtual world lately.

In today's world, families are gradually falling apart and the result is affecting children.

Together with multiculturalism, people's morals are gradually decreasing.

Recently, theft and fraud have become extreme, and crimes like this are increasing every day.

Human murders in the world are increasing day by day and this is one of the biggest socio-cultural problems affecting the agenda.

With the developing technology, the new generation lives in the **virtual** world by breaking away from the real world. The result is a distraction and a lonely society.

If every country, every person
does not fight for the future,
does not have their own
tradition, culture, language and
religion, these problems will
grow steadily!

*Thanks for your
attention!*
