

Ecological problems and environmental protection

The most serious environmental problems are:

- ***Pollution in its many forms (water pollution, air pollution, nuclear pollution)***
- ***Noise from cars, buses, planes, etc.***
- ***Destruction of wildlife and countryside beauty***
- ***Shortage of natural resources (metals, different kinds of fuel)***
- ***The growth of population***

Water pollution

Air pollution

***Air becomes polluted in
many ways.***

***Cars, trucks, buses,
airplanes, factories and
plants send burnt gases
into the air.***

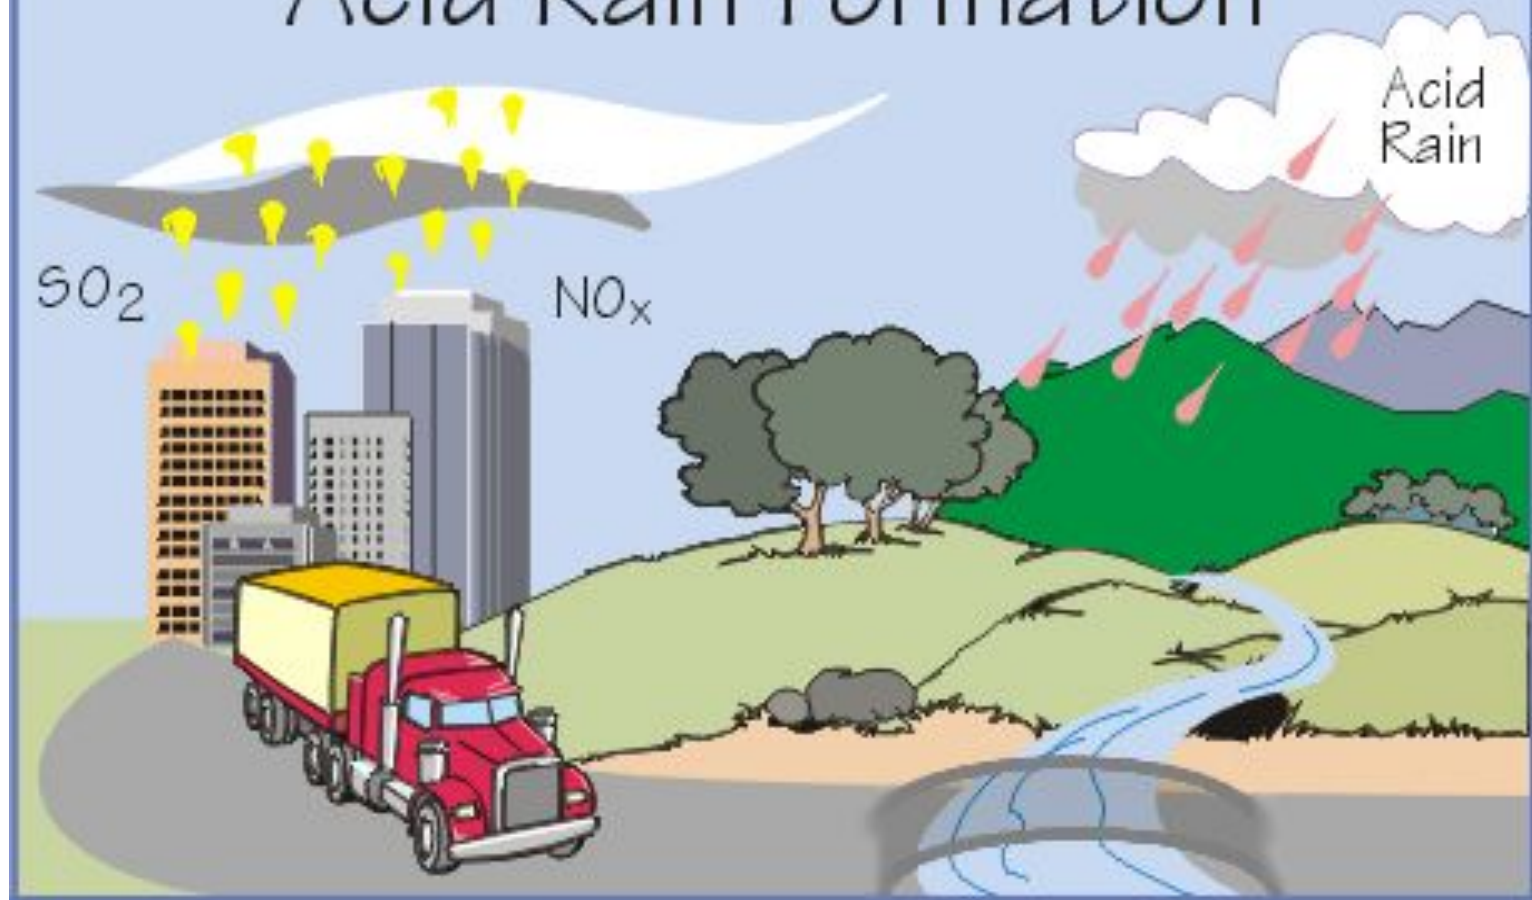

Greenhouse effect.

Acid rains

Acid Rain Formation

Nuclear pollution
