

# PROJECT

“My personal hotel”

My hotel is called the "Grand hotel of animals".

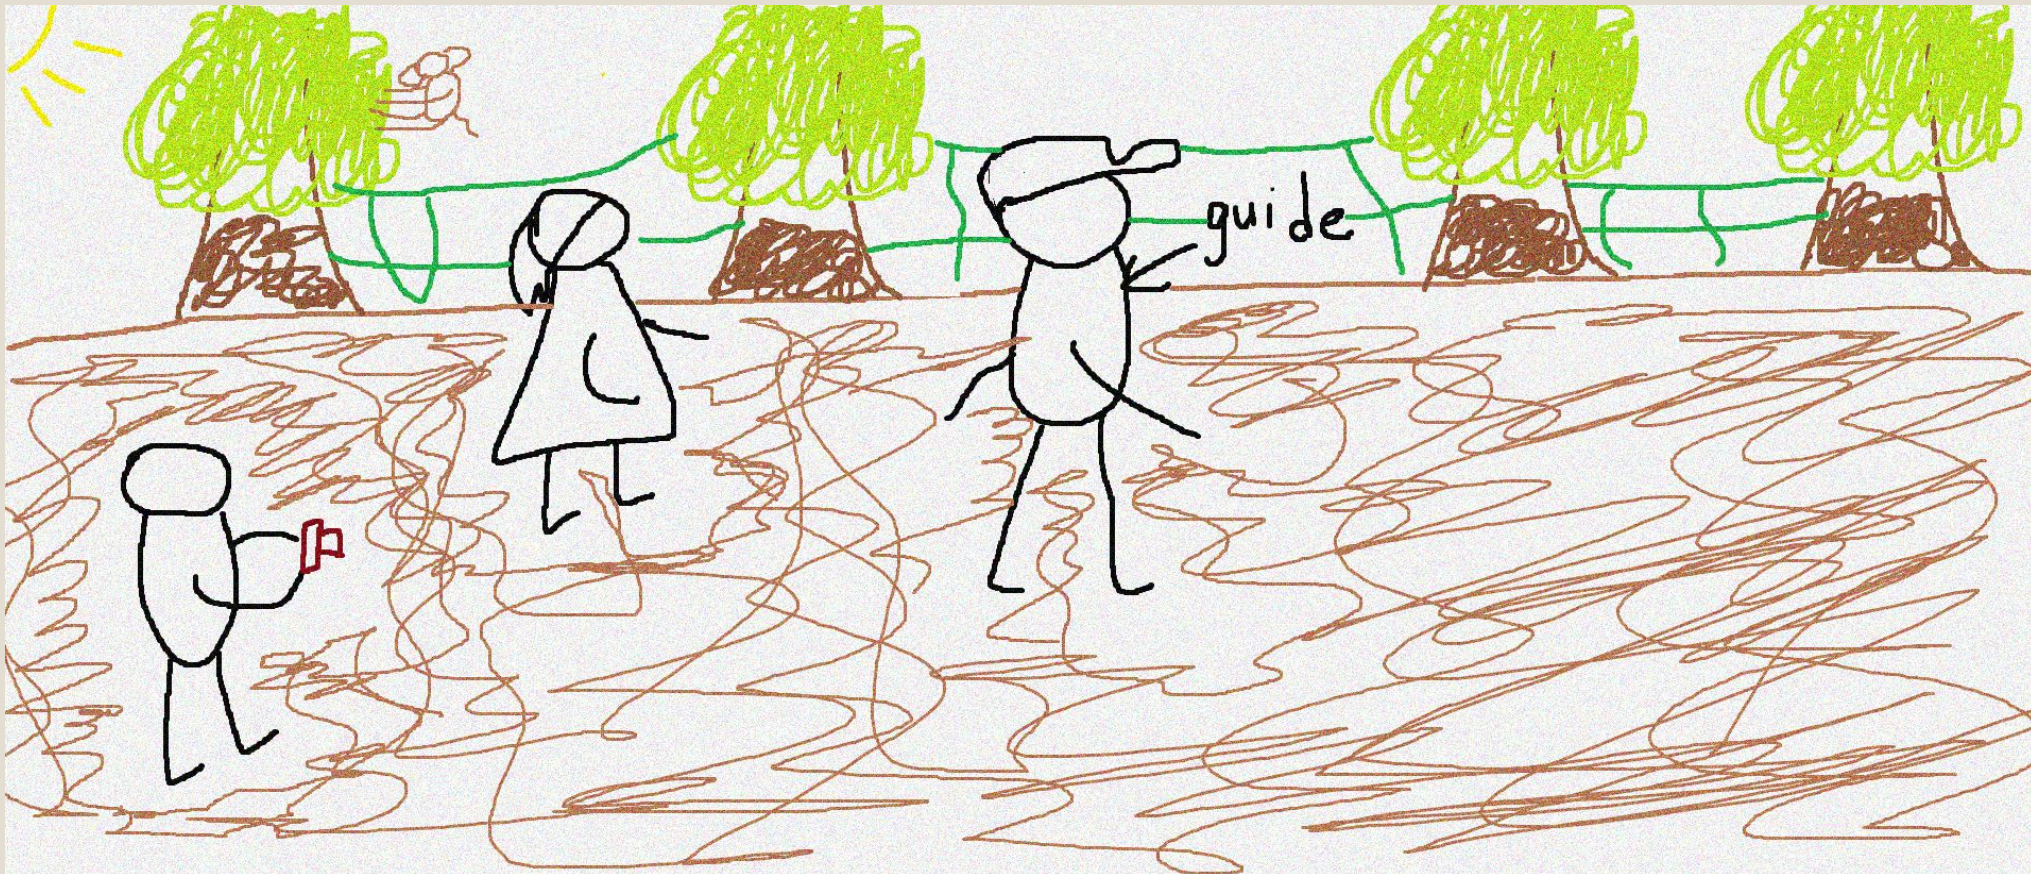

Its main idea is that it is located in the jungle of South Asia, among the flora and fauna.

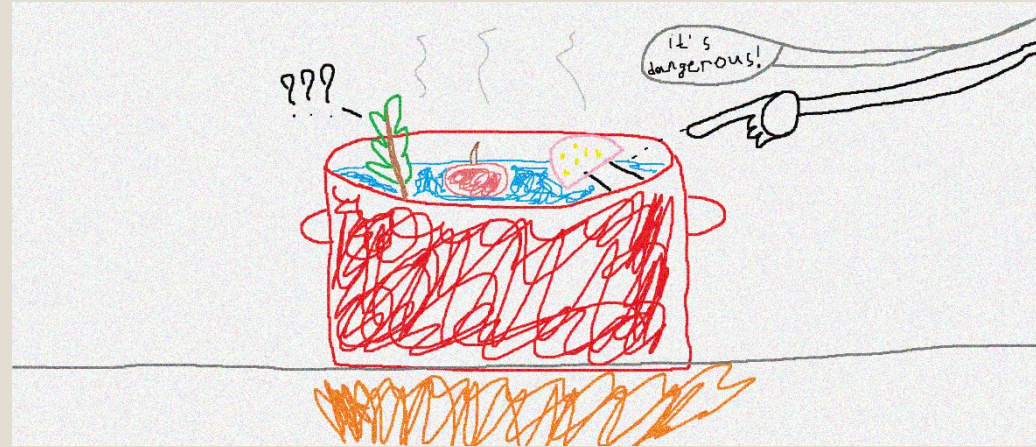

All rooms are located close to the habitat of various animals: elephants, bulls, leopards, etc.

The hotel staff also takes visitors on excursions and gives you a guide who will take you through the jungle and show you all the animals.

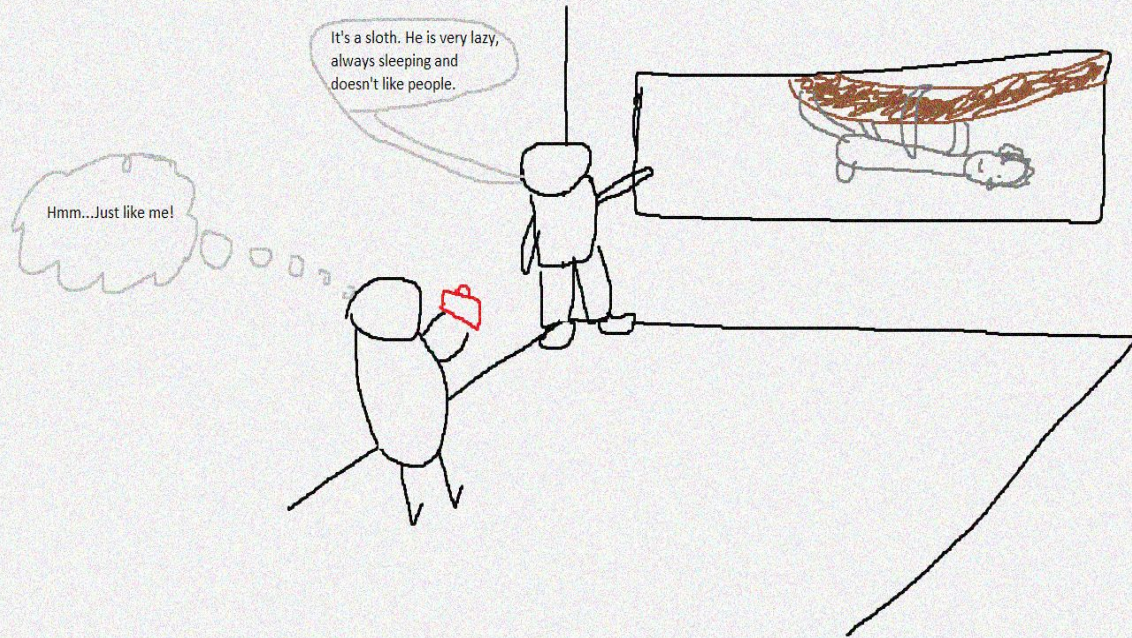

The hotel dining room menu features dishes made from plants that grow in the jungle.

The hotel staff can tell you interesting facts about any animal or plant that is found in the jungle

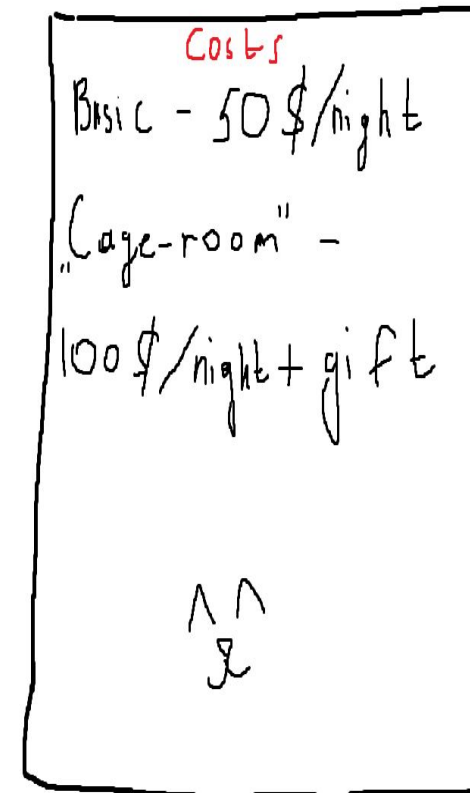

The main feature of the hotel are the “cage rooms”. They are located in close proximity to the animal habitats and are camouflaged so that the animals can't see them. The room looks like a large cage, covered with foliage, from which you can easily see everything around. In such rooms there is no electricity and various appliances. Staying in such rooms, visitors are right among the jungle animals and can observe their activities all day long.

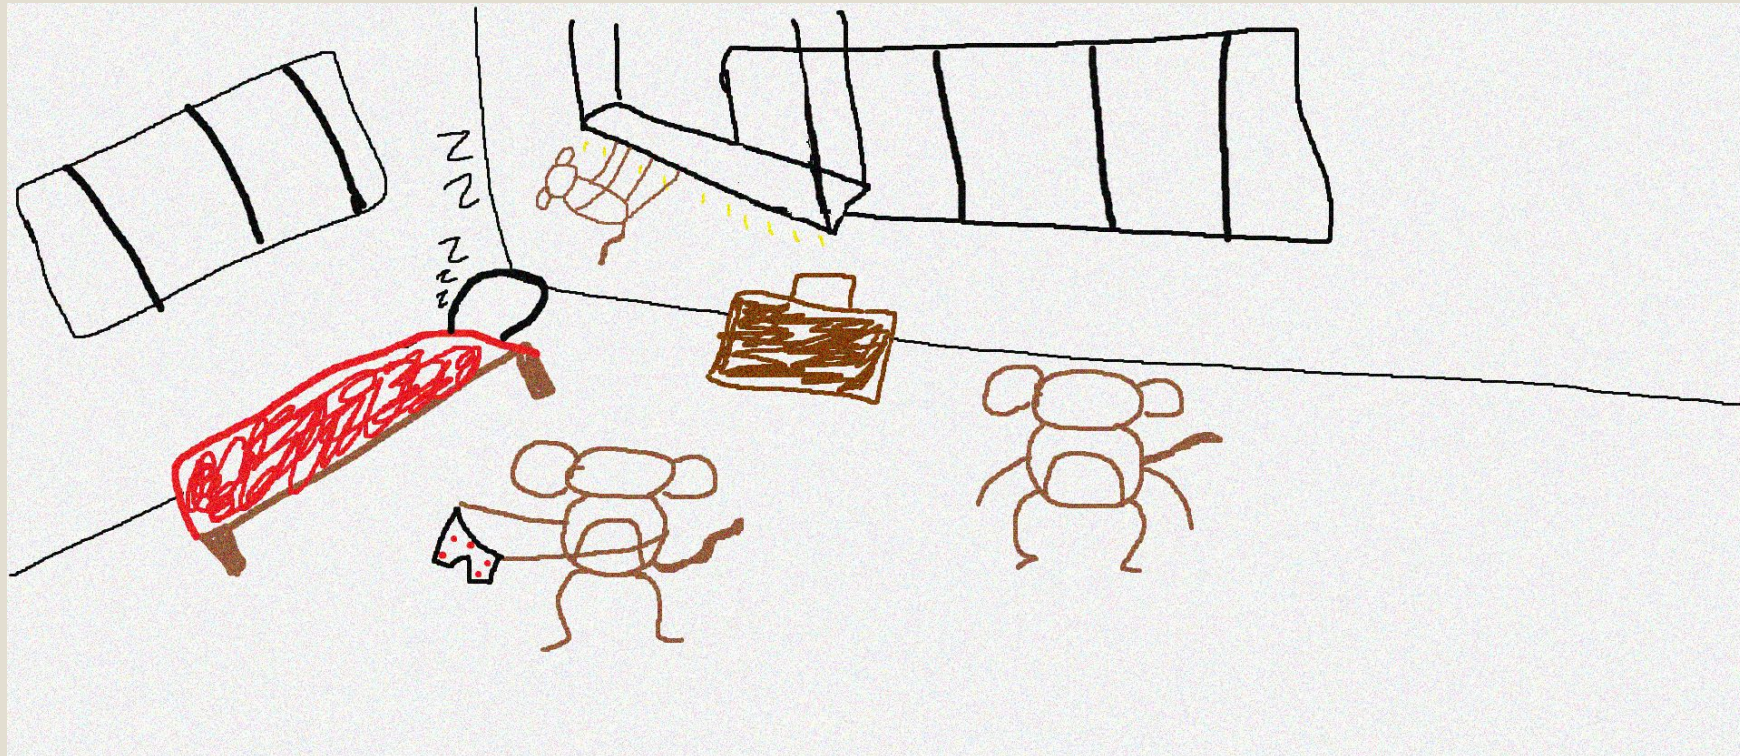

- The hotel is designed mainly for adults, with children can not settle in rooms-cages. The average cost of a regular room is \$50 per night, and the cost of a "cage room" is \$100. If you pay for a week's stay at once, you will receive a free guided jungle tour as a gift.

- There was an incident in a hotel recently. One of the visitors who was staying in the cage room forgot to close the door at night, and when he went to bed, a group of monkeys accidentally came into his room. They crashed the entire room and stole the guest's things. You should have seen his face when he woke up in the morning and saw what had become of his room! However, everything ended well in the end, the guest got away with nothing more than a fright, and his things were found later on the ground under the trees in the jungle. Some of his belongings were broken, but the guest was not too upset.

THANKS FOR YOUR ATTENTION!
