

Preserve the canal anatomy

The purpose of this clinical evaluation :

show that the Gentlefile system follow

The neutral shape of the canal

And Preserve the canal anatomy.

Therefore keep the strength of the canal wall,

Extend the tooth life

better hold the post

Keep the symmetric canal axis

Avoid ledge and perforation

The attached case accidentally show-3 different canal with the same patient but the last tooth performed by Gentlefile

Preserve the canal anatomy

Gentlefile - **gray**: initial start – 1x per canal

.Gentlefile - **red**: for the remaining procedure

Used in the all 4 canals

Obturation: Gutta percha 25 x 0.4 (all 4 canals) **Taper: 0.3-0.4**
