

# Why did I choose the profession of management?

Management is the work of managing a business, process or project and monitoring such activities. From a scientific point of view, management is a discipline that studies the principles and signs of effective management and explores how certain process management leads the organisation to success.

like being a manager  
and I want to create my  
own team that will  
follow me, so I chose  
management, where I  
can develop my skills  
and improve them to  
achieve my goals

# Pros and cons of management

Cons:

1. High level of competition in this area
2. Often a tense pace of work and stressful situations
3. Responsibility for making decisions

## Pros:

1. The opportunity to make good money.
2. Constant communication with different people, development of useful connections.
3. Mobility - frequent business trips and meetings are possible
