2 ESSENTIAL PARTS OF BEING A GOOD SPECIALIST IN ANY SPHERE

COMPUTER SKILLS + LANGUAGE SKILLS + YOUR SPECIALITY = GOOD, NEEDED, QUALIFIED, WELL-PAID, EFFECTIVE SPECIALIST

Let's combine and upgrade our computer and English skills!

What do you know about computers? What is it "a computer"? What does it do?

A computer is an electronic machine which can accept data in a certain form, process the data, and give the results of the processing in a specified format as information. First, data is fed into the computer's memory. Then, when the program is run, the computer performs a set of instructions and processes the data. Finally, we can see the results (the output) on the screen or in printed form .

AComputer is an electronic device that is designed

to work with Information.

COMPUTER SYSTEM

- HARDWARE

- SOFTWARE

Hardware

Examples

Below are examples of each type of device

Input Devices

Output Devices

Storage Devices

SOFTWARE

Types of Software

Software

1.System Software
Used to control and manage computer devices and operations

- Operating System
- Utility Program
