

Innovations in Sport

What do you see in the picture?

- A football?
- A lamp?

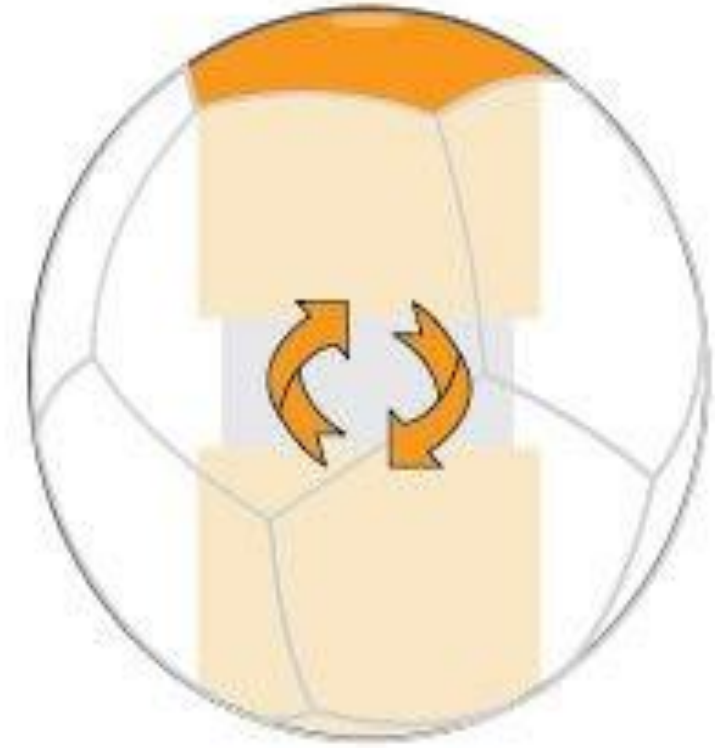

NO, it is

The Soccket

The soccket - it is the soccerball developing electrical power

The SOCKET has a unique design that is intended to meet the specifications of both a premium soccer ball and an eco-friendly generator

A gyrosopic mechanism inside the SOCKET captures the energy of motion and converts it into clean electricity

9 hours of energy are developed during a football match

How does it look like inside?

What is it used for?

LAMPS

MOBILE PHONES

WATER STERILIZERS

FANS

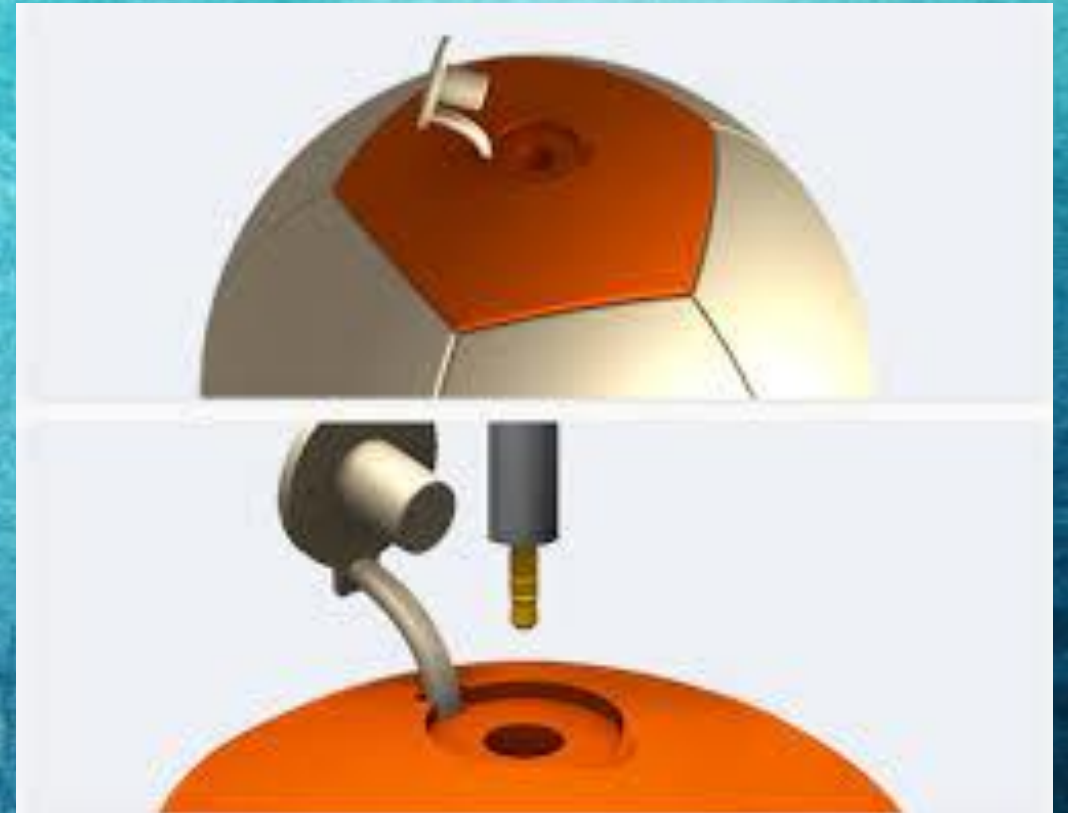

SPEAKERS

How can we connect it?

USB-jack

Headphone jack

How much does it cost?

American
Market

100 \$

Our
Company

75\$

You do feel a difference!
