

«Первый полёт»

Выполнили: Винокуров Евгений,
Минин Александр
учащиеся 7А класса ГБОУ лицей №273
Руководитель: Планкина А.А
учитель физики

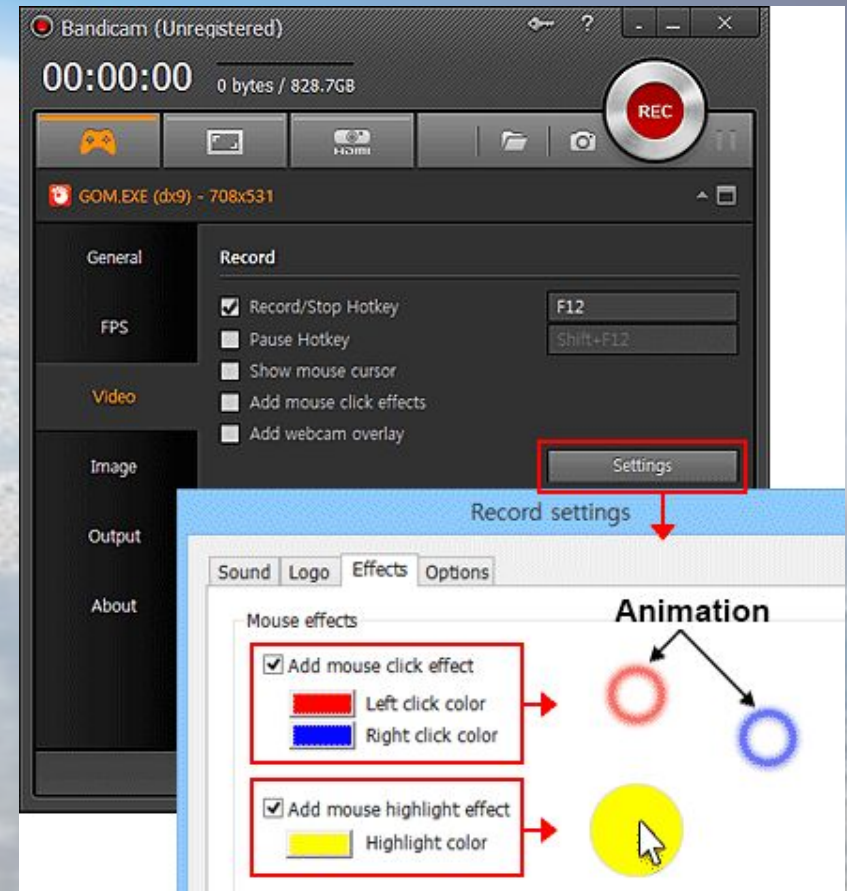

Программы, используемые для создания мультфильма:

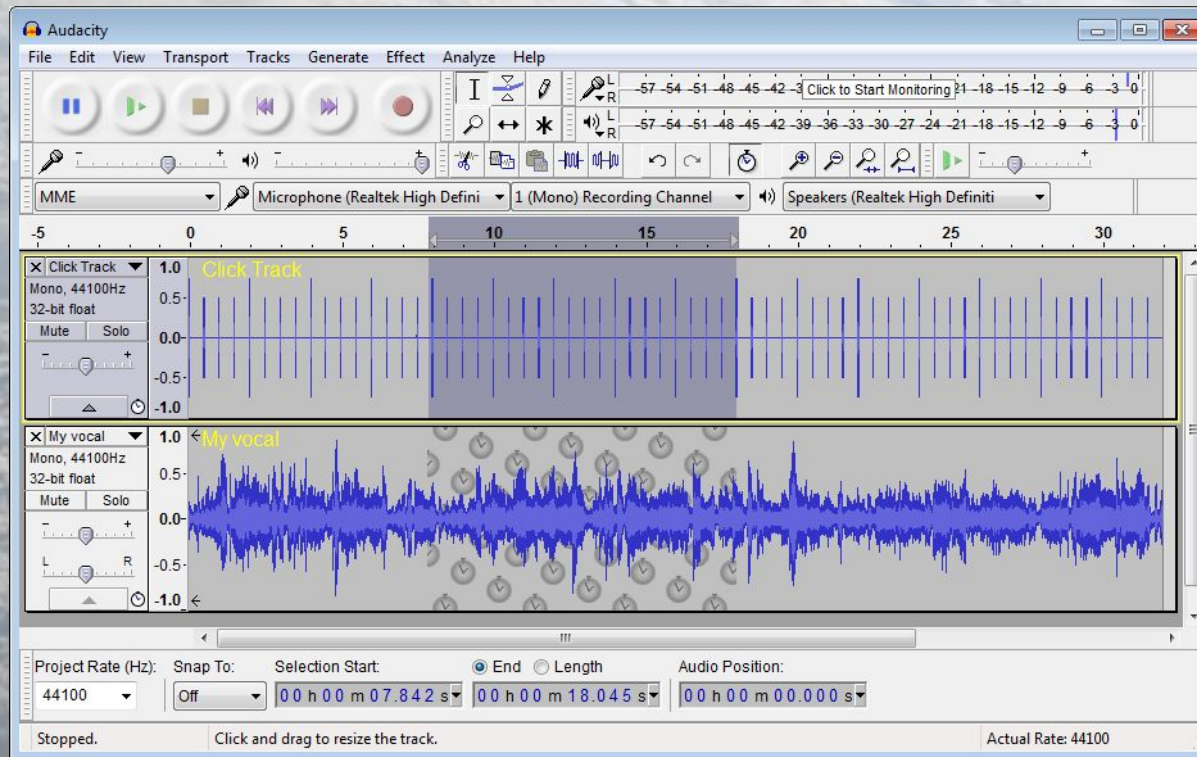

- *Pivot Animator*
- *BandiCam*
- *Audacity*
- *Gimp*

Bandicam

Audacity

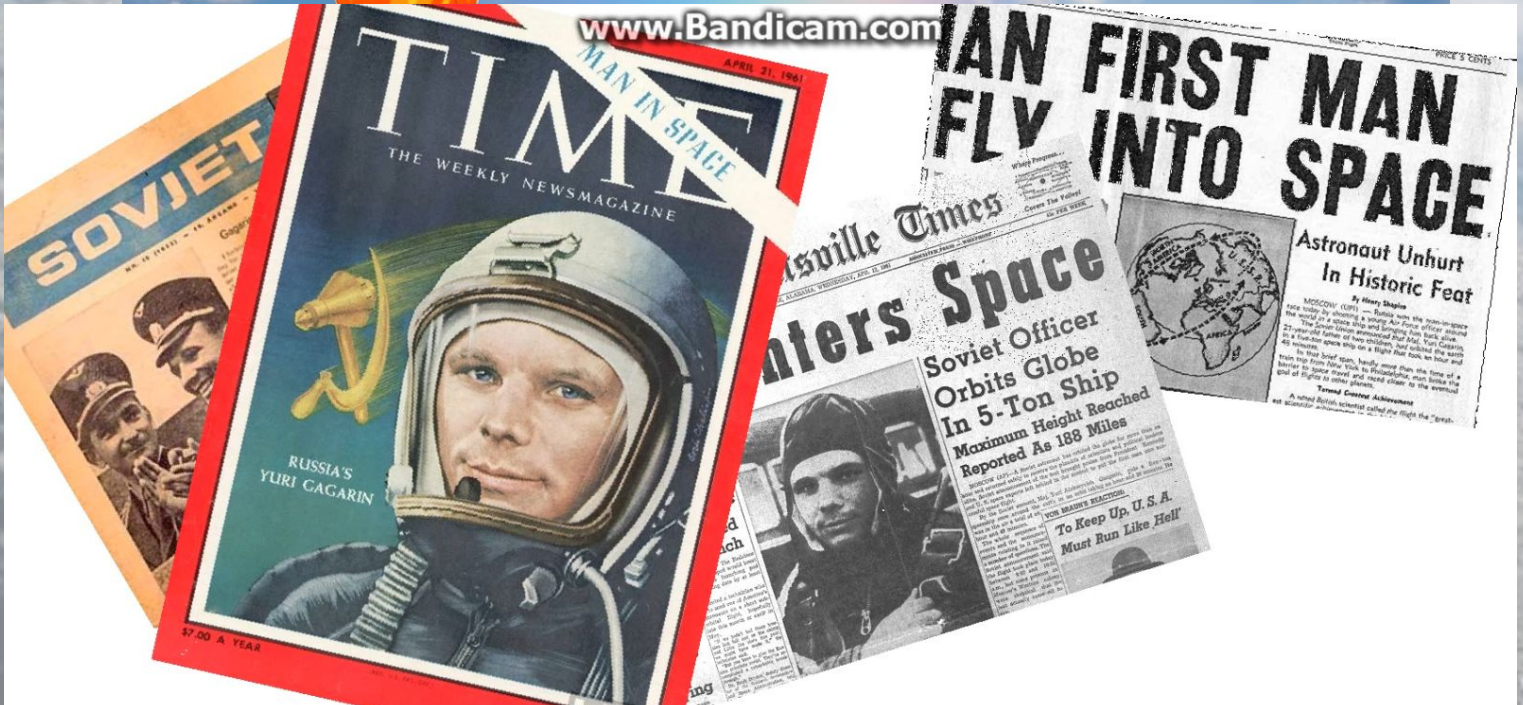

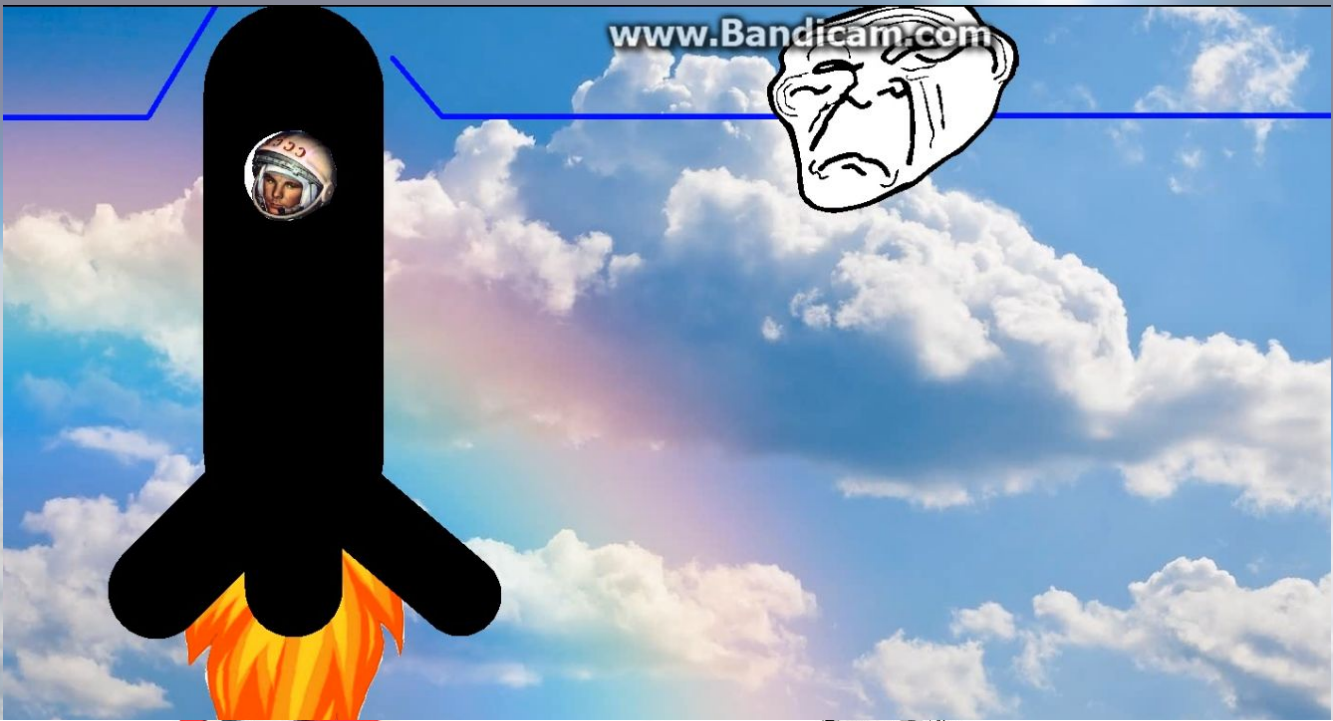

Gimp

The screenshot displays the GIMP (GNU Image Manipulation Program) interface. The main window shows an image of a road with a blue blur effect. Several dialog boxes are open:

- Paintbrush:** Shows the current brush settings. The brush is set to "Circle (11)", with an opacity of 100.0 and a length of 100 px. The "Blur Radius" dialog is also open, showing a radius of 11.0 px.
- Open Image:** A file browser window showing a list of files. The selected file is "Hundfjallet 006.jpg", which is 658 KB, 1280 x 960 pixels, and has 1 layer.
- Gaussian Blur:** A dialog box for applying a Gaussian blur. The "Blur Radius" is set to 11.0 px, and the "Blur Method" is set to "IIR".

The interface includes a menu bar (File, Xtns, Help), a toolbar, and a status bar at the bottom showing the current image and tool.
