

«Первый полёт»

Выполнили: Винокуров Евгений,
Минин Александр
учащиеся 7А класса ГБОУ лицей №273
Руководитель: Планкина А.А
учитель физики

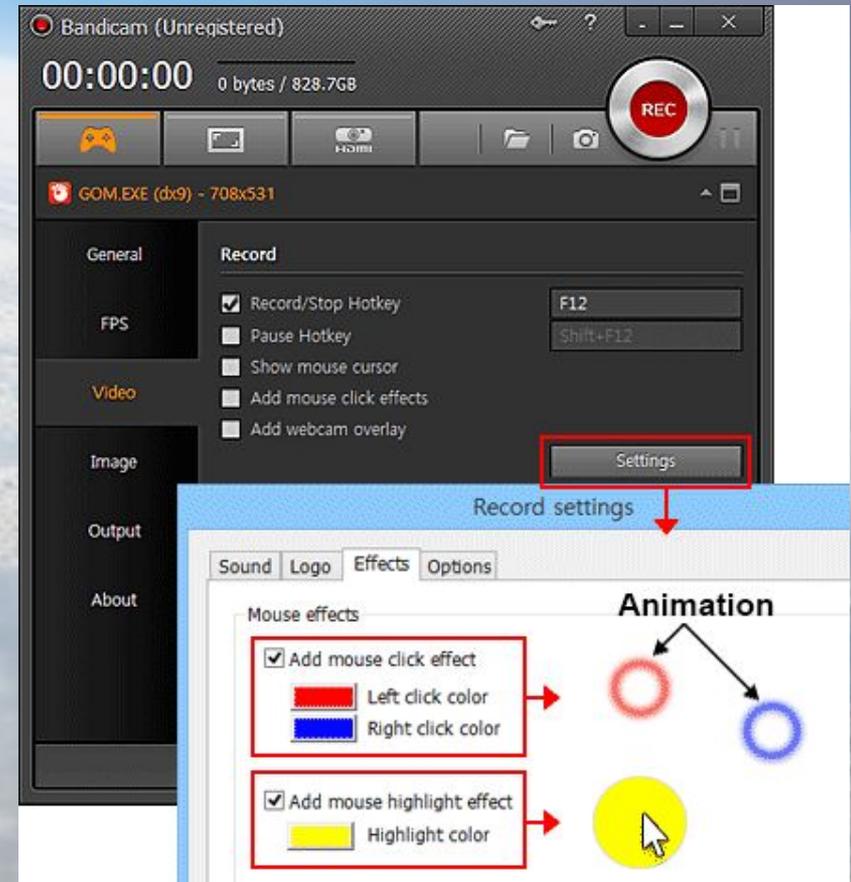

Программы, используемые для создания мультфильма:

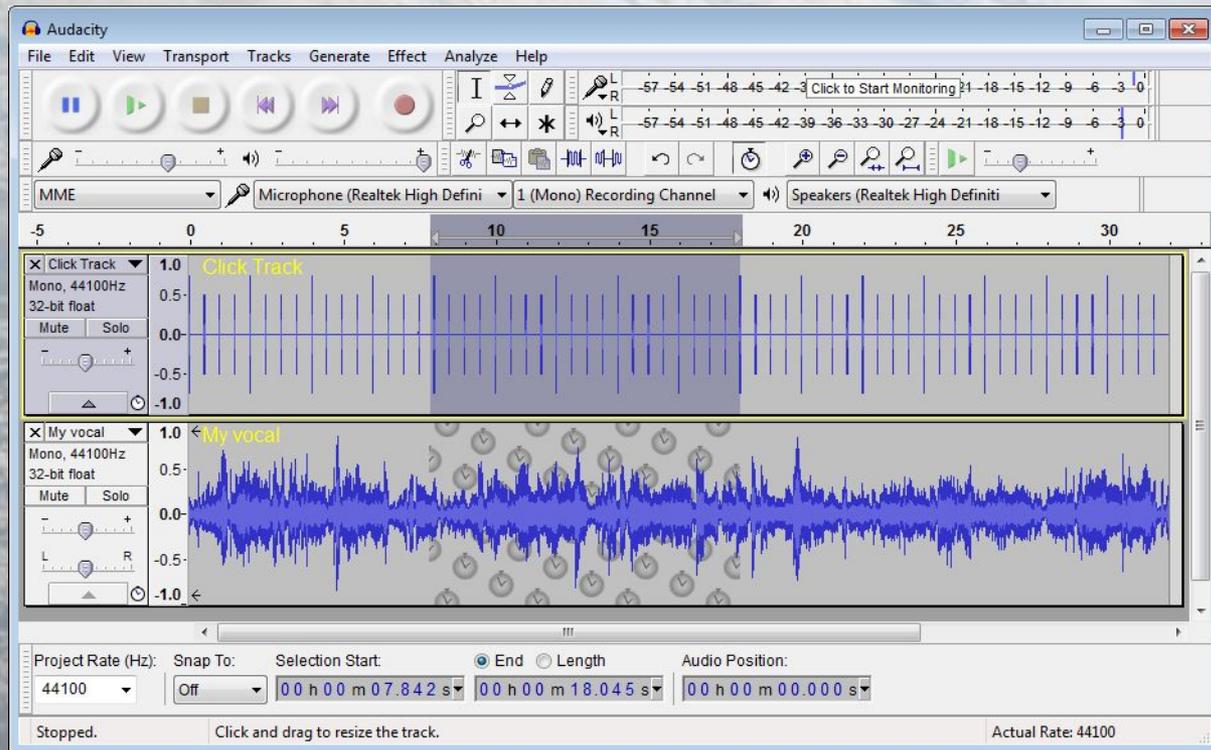

- *Pivot Animator*
- *BandiCam*
- *Audacity*
- *Gimp*

Bandicam

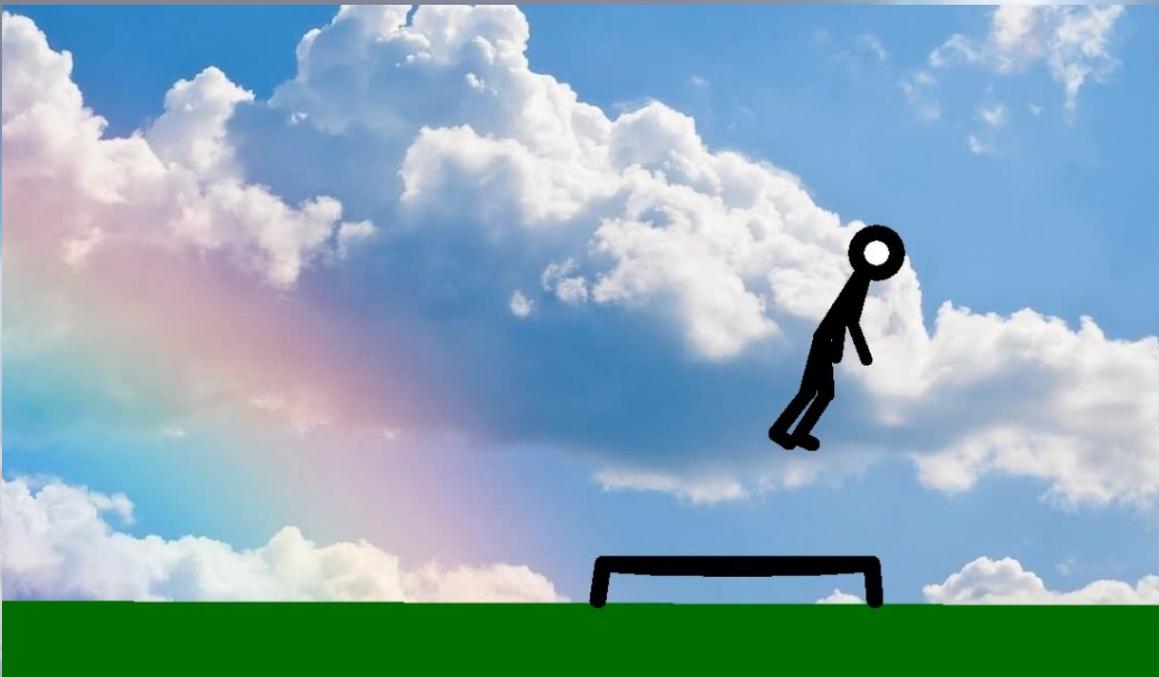

Audacity

Gimp

A screenshot of the GIMP (GNU Image Manipulation Program) software interface. The main window shows an image of a road with a slide. Overlaid on this are several dialog boxes: 'Open Image' on the right, 'Gaussian Blur' in the center, and 'Paintbrush' on the left. The 'Paintbrush' dialog shows 'Circle (11)' as the selected brush. The 'Gaussian Blur' dialog shows 'Blur Radius' set to 11,0 px and 'Blur Method' set to IIR. The 'Open Image' dialog shows a file named 'Hundfjallet 006.jpg' with a size of 658 KB and dimensions of 1280 x 960 pixels. The bottom taskbar shows the Start button, 'The GIMP' application, and several open windows: 'Layers, Channels, Path...', 'Open Image', 'Hundfjallet 006.jpg-4.0...', and 'Gaussian Blur'. The system tray on the right shows the system clock at 00:13.
