

Creatine Monohydrate

100% Pure Powder
ATP Energizer*

SUGGESTED USAGE: As a dietary supplement, mix 1 heaping teaspoon in fruit juice or other sweetened liquid 3 to 4 times daily, before and after exercise, for the first 7 days. Thereafter, for maintenance use, consume 1 to 3 times daily. Allow 3 to 4 hours between doses. For continuous use beyond 28 days, use one serving daily. Consider taking this product in combination with NOW® Pyruvate, D-Ribose and Carbo Gain.

Creatine Monohydrate is a naturally occurring compound found in the human body and obtained in the diet primarily from meat and fish. Creatine is a basic body supplement among active individuals because of its ability to increase the ultra-supplement, especially during intense physical activity. It is a naturally occurring compound of creatine, the body's primary energy source, and glycine, the body's primary building block of protein. It is a naturally occurring compound found in the human body and obtained in the diet primarily from meat and fish. Creatine is a basic body supplement among active individuals because of its ability to increase the ultra-supplement, especially during intense physical activity. It is a naturally occurring compound of creatine, the body's primary energy source, and glycine, the body's primary building block of protein.
