

Topic for Exam Presentation

The Role of Physics in Our Life

Evaluating Oral Presentation

1) **Audibility**

Can you hear clearly throughout?

2) **Pace**

Is the pace of the speech, or flow of ideas, too fast or too slow?

3) **Fluency**

Is the speech pattern fluent, indicating familiarity with the material and rehearsal of delivery?

4) **Tone and Energy**

Is there sufficient variation in tone? Does the presenter seem enthusiastic?

5) Appropriateness to the Audience

Is the content and approach relevant, interesting and engaging?

6) Structure and Cohesion

Was the structure clearly outlined? Is the order logical and easy to follow? Is it signposted throughout? Is the balance of various elements effective? Is timing accurate?

7) Use of Visual Aids

Is there a suitable amount? Are they easy to read? Do they effectively support the oral delivery? Does the presenter use them competently?

Exam Topics (exam-cards)

- 1) The Role of English in my Life
- 2) Student's Day / University
- 3) My Future Profession
- 4) The History of Physics
- 5) Units of Measurements
- 6) Speed, Time, Distance
- 7) Newtonian Mechanics
- 8) Heat and Energy
- 9) Sources of Light
- 10) Theories of Light
- 11) Electricity and Magnetism
- 12) Electromagnetic Induction
