Which animals have fins, live in water and breathe through gills?

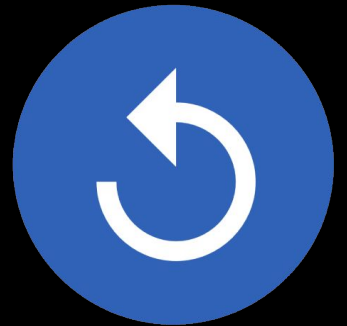

Fish

Reptiles

Insects

**Oh no! Your
Jeep is stuck
in the mud. Go
back and try
again!**

Safari Stop #3

Which animals live both on land and in water, have moist skin and no scales?

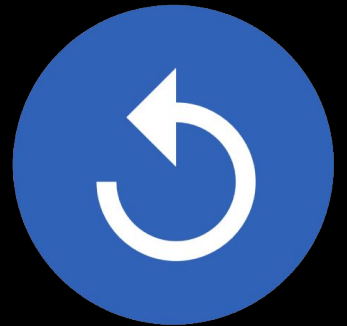

Amphibians

Reptiles

Mammals

**Oh no! Your
Jeep is stuck
in the mud. Go
back and try
again!**

Safari Stop #4

Which animals have scales or rough, dry skin ?

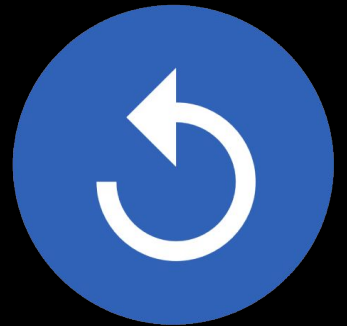

Amphibians

Reptiles

Mammals

**Oh no! Your
Jeep is stuck
in the mud. Go
back and try
again!**

Safari Stop #5

Which animals have a beak or bill, feathers, wings and lay eggs?

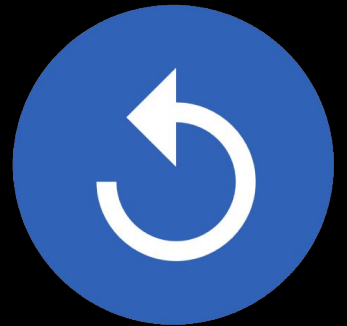

Fish

Birds

Mammals

**Oh no! Your
Jeep is stuck
in the mud. Go
back and try
again!**

Safari Stop #5

Which animals have fur or hair, usually give birth to live young and nurse their babies with milk?

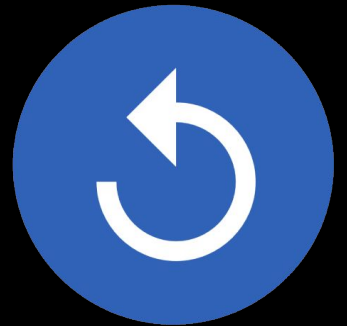

Fish

Birds

Mammals

**Oh no! Your
Jeep is stuck
in the mud. Go
back and try
again!**

Safari Stop #6

What animal part do animals use to find food or for seeing their predators?

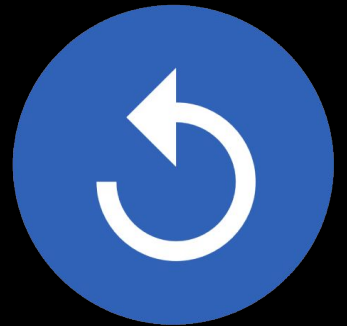

eyes

claws

beak

**Oh no! Your
Jeep is stuck
in the mud. Go
back and try
again!**

Safari Stop #7

What animal part do animals use to let them know that a predator is approaching?

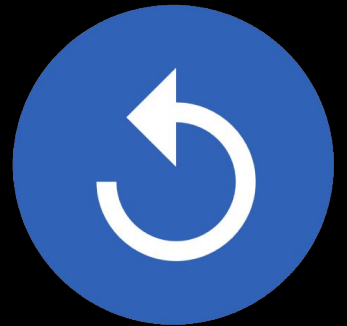

movement

ears

beak

**Oh no! Your
Jeep is stuck
in the mud. Go
back and try
again!**

Safari Stop #8

What animal part do animals use to help them find food and other resources?

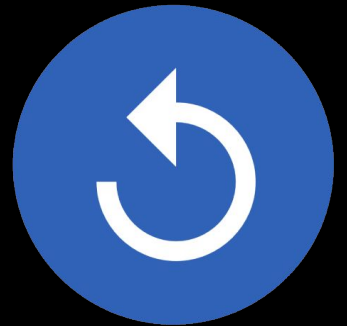

beak/mouth

ears

movement

**Oh no! Your
Jeep is stuck
in the mud. Go
back and try
again!**

Safari Stop #9

Animals use their quills, claws, wings and camouflage for...?

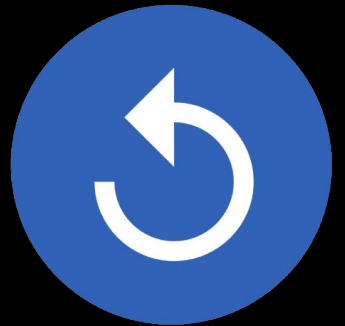

protection

grasping objects

movement

**Oh no! Your
Jeep is stuck
in the mud. Go
back and try
again!**

Safari Stop #10

An animal's life span from birth to death is called a...?

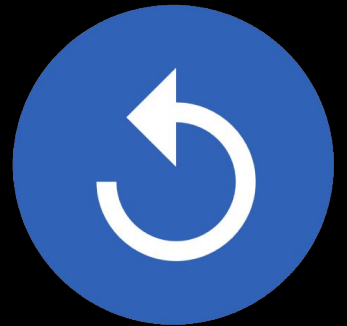

food chain

life cycle

metamorphosis

**Oh no! Your
Jeep is stuck
in the mud. Go
back and try
again!**

Safari Stop #11

What do animals produce that plants need to survive?

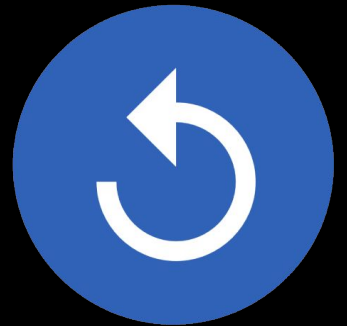

air

oxygen

carbon dioxide

**Oh no! Your
Jeep is stuck
in the mud. Go
back and try
again!**

Safari Stop #12

What do plants produce that animals need to survive?

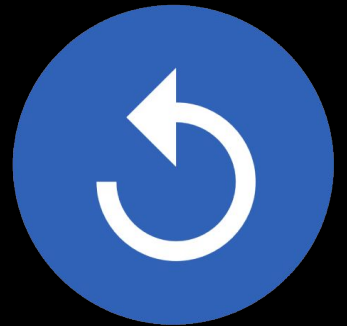

air

oxygen

carbon dioxide

**Oh no! Your
Jeep is stuck
in the mud. Go
back and try
again!**

Safari Stop #13

What is one way that animals/humans cannot impact their environment?

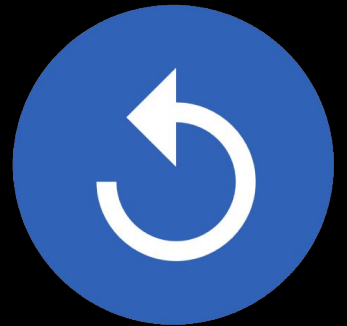

Sing

Build dams

Cut down trees

**Oh no! Your
Jeep is stuck
in the mud. Go
back and try
again!**

Safari Stop #14

Which of the following is NOT an animal's response to changes in their environment?

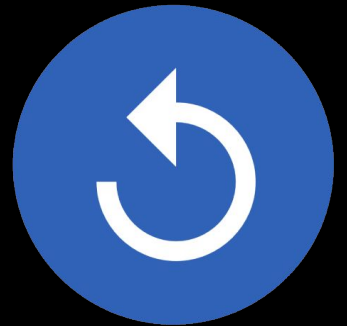

migrating

hibernating

crying

**Oh no! Your
Jeep is stuck
in the mud. Go
back and try
again!**

Safari Stop #15

What is a large body of salt water where animals have blubber, fins, gills or very sharp teeth to survive?

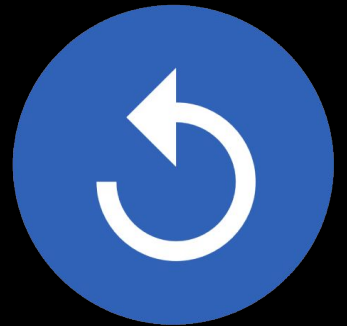

ocean

wetlands

forest

**Oh no! Your
Jeep is stuck
in the mud. Go
back and try
again!**

Safari Stop #16

What are rivers and lakes called that provide homes to trees, plants, fish, insects, turtles and birds?

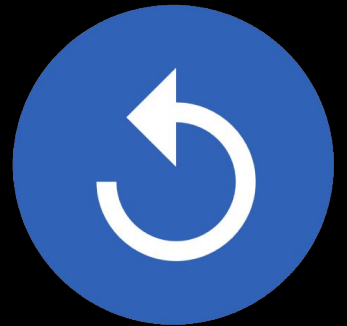

ocean

wetlands

freshwater

**Oh no! Your
Jeep is stuck
in the mud. Go
back and try
again!**

Safari Stop #17

Where do animals have structures that help with shortage of water, extreme temperature changes and food shortage?

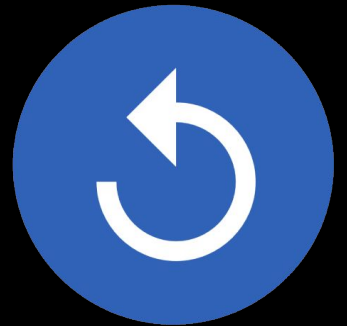

forests

deserts

ocean

**Oh no! Your
Jeep is stuck
in the mud. Go
back and try
again!**

Safari Stop #18

Where do animals eat plants, use trees for shelter and adapt to distinct seasons?

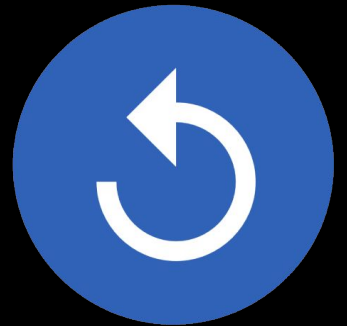

forests

deserts

ocean

**Oh no! Your
Jeep is stuck
in the mud. Go
back and try
again!**

Safari Stop #19

What habitat has very shallow water with wet soil most of the time?

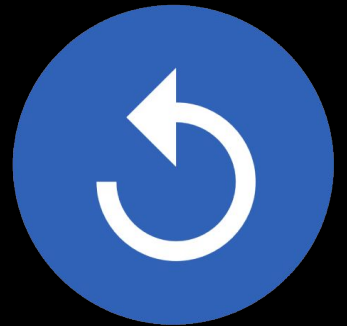

forests

wetlands

ocean

**Oh no! Your
Jeep is stuck
in the mud. Go
back and try
again!**

Safari Stop #20

In what habitat do animals have thick coats to keep warm?

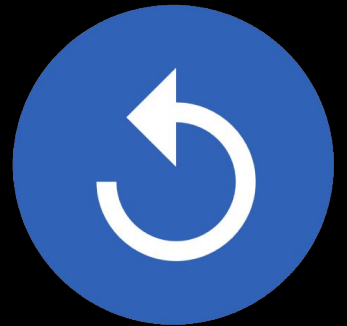

forests

wetlands

polar lands

**Oh no! Your
Jeep is stuck
in the mud. Go
back and try
again!**

Congratulations!

You made it without being eaten by a wild animal. Click on Watson for a dance party!
