The Tower of London

10 Downing Street

Westminster Abbey

Buckingham Palace

Hyde Park Corner

A photograph of a section of the Roman Wall of the City. The wall is constructed from rough-hewn stone and features two semi-circular arched openings. To the left, a modern building with a grid of windows is visible. To the right, a brick building with several windows sits atop the wall. The foreground shows a paved area with a black metal railing and a small potted tree. The title "The Roman Wall Of the City" is overlaid in large yellow text.
