Airship

An airship is a type of lighter-than-air aircraft that can navigate through the air under its own power. In early airships, the lifting gas used was hydrogen, due to its high lifting capacity and ready availability.

Who?

Inventor Ferdinand von Zeppelin full name Ferdinand Adolf Heinrich August von Zeppelin. He born in July 8, 1838 in Germany and die in March 8, 1917. He build his firs airship in year 1900.

Airship

It had a solid steel frame, large hydrogen bags and passenger cabin. The second largest airship was called Hindenburg. The Hindenburg airship was destroyed by fire while landing at the airport.
