

Что такое линейка и что она умеет ?

Задание: изготовление изделий с основой квадратной

Линейка — простейший измерительный геометрический инструмент, представляющий собой пластину, у которой как минимум одна сторона прямая. Обычно линейка имеет нанесённые деления, кратные единице измерения длины (**сантиметр**, **дюйм**), которые используются для измерения расстояний.

Линейки обычно производят из пластика или дерева, реже из металлов.

Виды линеек:

деревянные

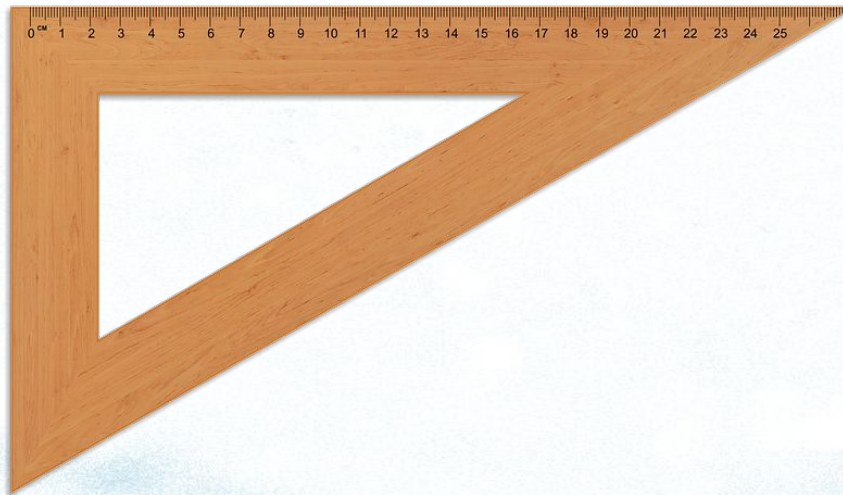

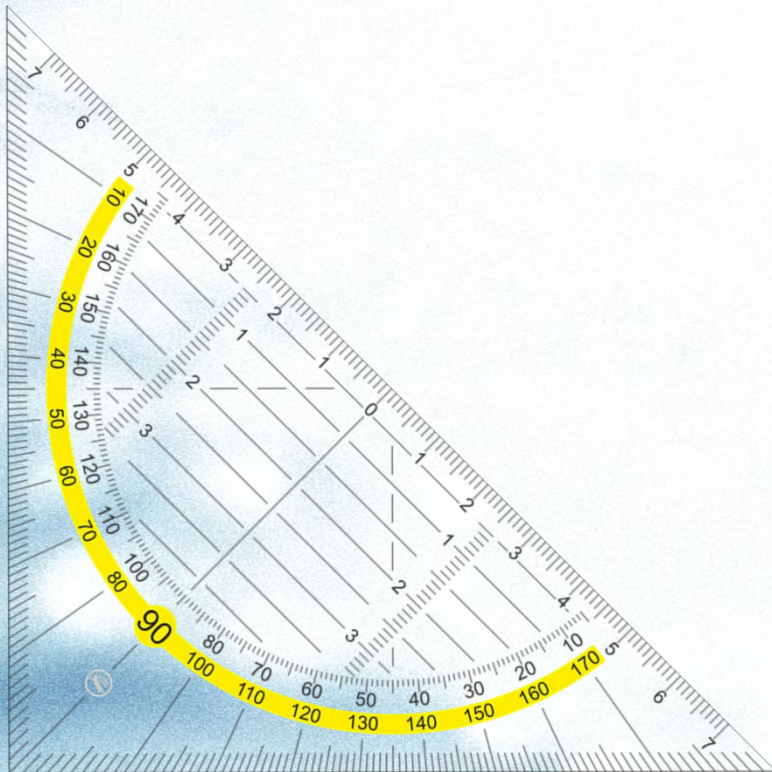

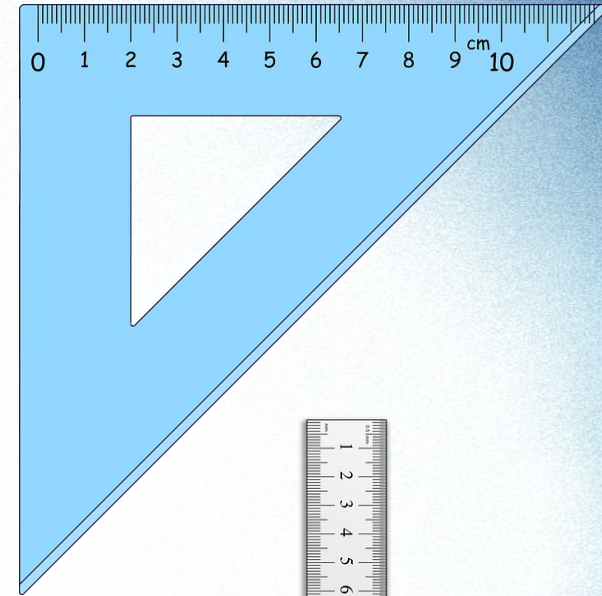

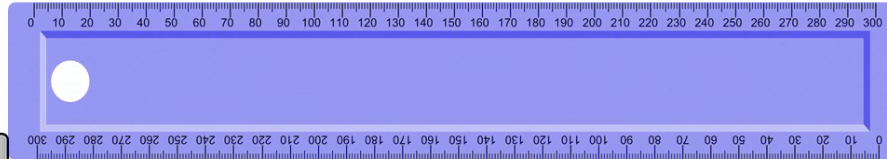

пластмассовые

металлические

Виды линеек

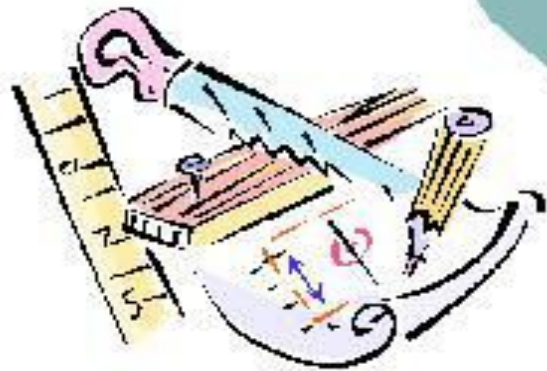

Угловая линейка(1), прямая линейка(3), штангенциркули(2) и рулетка(4).
