## **Cloud Platform Introduction**

Anviz CrossChex Cloud system is based on Amazon Web Server (AWS). Through the data transfer between local terminales and storage server, the remote time attendance and access control could be realized simply.

#### **Cloud Time Attendance Control**

In cloud platform, you can creat and modify users and send the information to remote devices. And manage attendance records obtained from the data transfer.

| 🤓 CrossChex Cloud  | × +                   |                  |                             |                    |                   |                      |                     |            |                      |                      | _                      | o ×                     |
