Conquest Cosmos

Evening 10th, August we were planning to go to Cosmos Mount. We divided on two groups: the first group were going to mount, the second group stayed in the camp. Mount hadn't road to go up. Peak Cosmos had forest. Guide's chosen way for climbing was in the morning. We went along hill slightly up, then went up one or two meters and then next. When I tired I told myself "It is ended" or I chose tree or stone to which I would go. We ended climbing and did a stop. I saw a fantastic view. We went down across 40 minutes. We were going at first on ridge mount. We stopped to eat berries. Raspberries and red currants were delicious, but I and seven people lost the group. We were to go next on road in forest. We met the group on the next road. They stayed to wait for us. Way down wasn't easier than climbing up. When I went down I played with friends agame "Cities". If you play, the road would be faster.
