Attractions of Australia

Opera house (Sydney). The Sydney landscape is clearly recognized among thousands of other cities thanks to the world-famous landmark-the Opera house, one of the most famous in the world of architecture. This unique building was designed by a Danish architect named Jorn Utzon. Having designed the original shape of the roof of the theater, the Dane gave Sydney a symbol of the city, which now almost every inhabitant of the planet recognizes this city.

Many years after the construction of the famous building, the architect admitted that he was inspired to create a unique roof of the theater, removed from the fruit in triangular segments. Opera house has always attracted the attention of tourists with its unusual forms, which is why this architectural creation has become almost an integral part of any tour in Sydney.
