

A scenic sunset over a body of water. The sun is a bright, glowing orb in the upper left, casting a shimmering path of light across the water's surface. The sky is a deep, warm orange. In the foreground, the dark silhouette of a kangaroo is captured in mid-leap, moving from left to right. The overall mood is peaceful and evokes a sense of the Australian outback.

AUSTRALIA

LOCATION

Australia is in the **Southern Hemisphere**.

Because it is south of the equator, the **seasons** in Australia are **the opposite** of those in Europe: it's **winter** in Australia when it's **summer** in Europe.

- It's the **6th biggest country** in the world
- It's an **island**, surrounded by water.
- It's the **smallest continent** in the world

Australia is composed of **7 territories**:

Western Australia, Northern Territory, Queensland, South Australia, New South Wales, Victoria + Tasmania, and Papua New Guinea.

HISTORY

James Cook discovered Australia in 1770.

Britain sent **prisoners**
and **criminals** to Australia.

Native Australians. The **Aborigines** have lived in Australia for over 40,000 years. Now they only represent 1% of the population. The total population of Australia is 22 million.

CITIES

OTHER IMPORTANT CITIES

Melbourne

Brisbane

Where are the majority of important cities in Australia?

GEOGRAPHY

Uluru (Ayers Rock) is the world's largest **monolith**. It is sacred for Aborigines.

It is very popular with tourists because of its beautiful colours.

THE AUSTRALIAN FLAG

Southern cross symbolizes the constellation.
