| 6. Territory | damage |
| 7. terrible | light |
| 8. Artificial | activity |
| 9. Rare | extinct |
| 10. Way to | habitat |

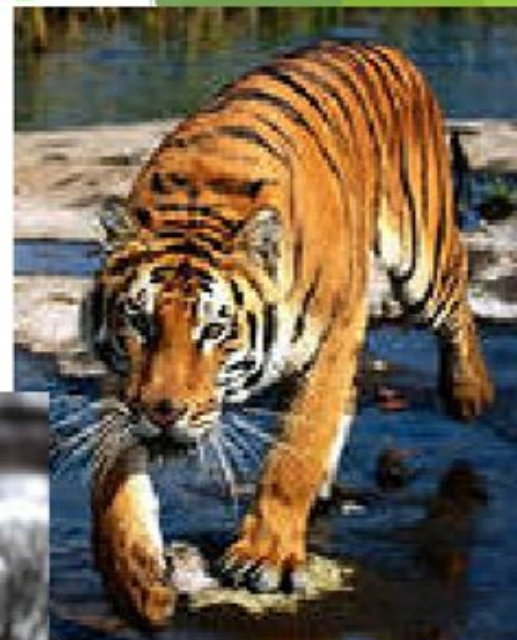

reading for specific information

Read the text p.59

Answer the questions based on the text:

- Why are beaches important for sea turtles?
- What do the young turtles find when they hatch from their eggs?
- How can people help protect the loggerhead sea turtles?

Animals in danger

Collecting information/researching/ writing an article(using the Internet)

- Name and type of species;**
- Habitat;**
- Threat (s);**
- What measures are taken for saving this animal?**

Suggested Answer Key

Polar Bears

The polar bear is an endangered species in Russia. It is a member of the bear family. It lives in the Arctic region around the North Pole, which covers five countries: Russia, the United States (Alaska), Canada, Greenland, and Norway.

It lives and hunts on the ice surrounding the North Pole. In Russia, polar bears can be found in Siberia. There are about 20,000 in the world still in the wild.

Polar bears are endangered because their habitat is melting. In addition, they are under threat from illegal hunters who kill them for their valuable furs.

Canada, the USA, Denmark, Norway and Russia have signed an agreement to protect them and their habitat.

Green wisdom

There is no place in nature for extinction.
(Lucretius, Roman poet and philosopher)

Can you explain these words?

Синквейн

1. **1-ая строка** отвечает за основную тему занятия и состоит из ключевого слова
2. **2-ая строка** — два прилагательных, характеризующих это понятие
3. **3-я строка** — три глагола, отвечающих за действие
4. **4-ая строка** — короткое предложение, раскрывающее суть происходящего
5. **5-ая строка** — синоним главного слова
