

Вселенная и КОСМОС

Верещагина Екатерина,
9 «Б» класс

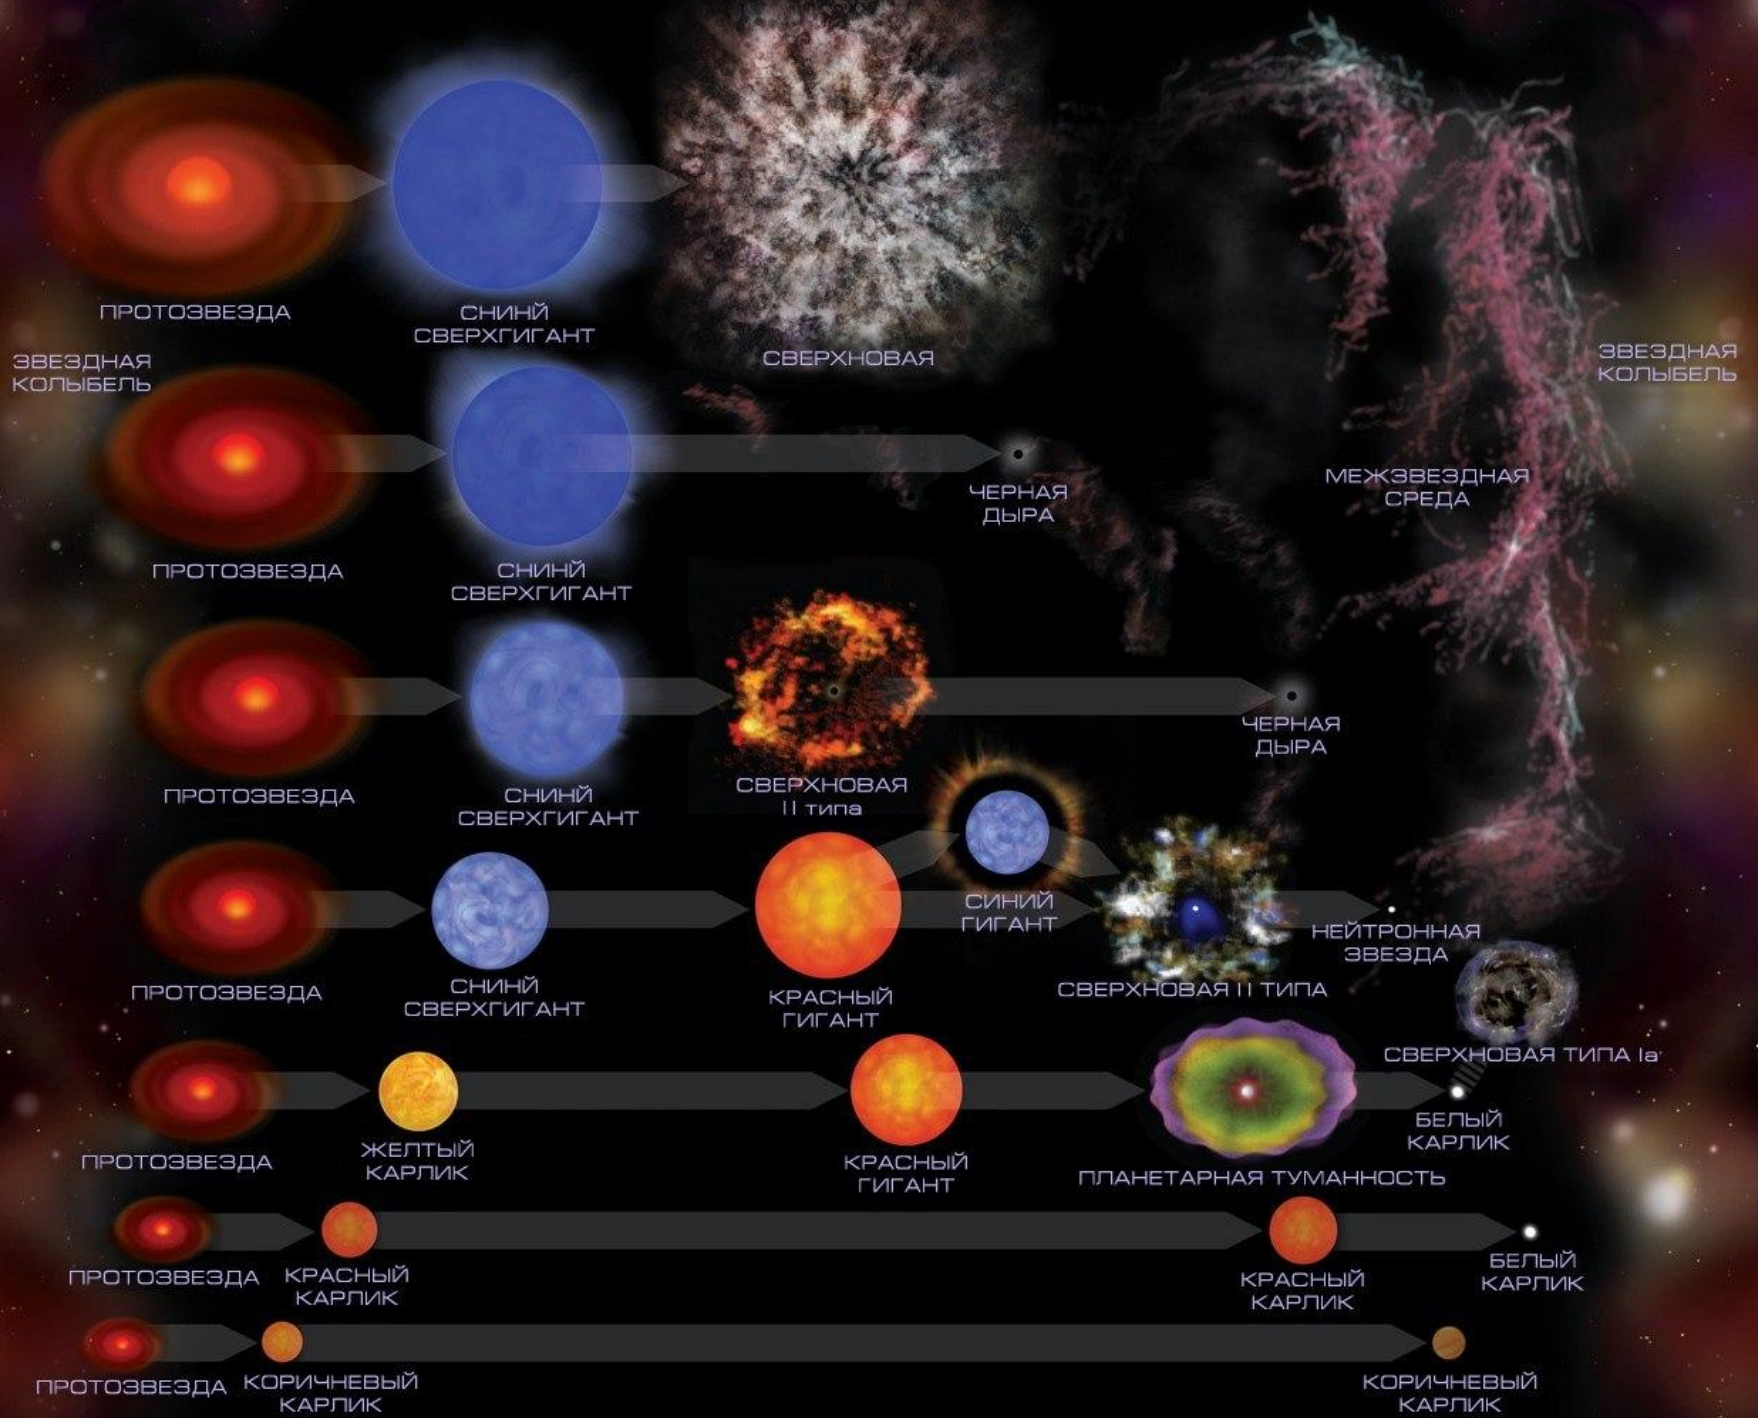

The background is a high-resolution astronomical image of a star field. It features a vast number of stars of varying magnitudes, from tiny pinpoints of light to larger, more detailed stars with visible diffraction patterns. Interspersed among the stars are wispy, glowing clouds of interstellar dust and gas, known as nebulae, which appear in shades of blue, white, and faint orange. The overall color palette is dominated by deep blues and blacks, punctuated by the warm whites and yellows of the stars.
