

Проектно-исследовательская работа по теме:

“Почему средневековые крестьяне ели больше, чем мы?”

Выполнил учащийся
9Б класса Загорин Матвей Александрович
Руководитель: Попова. С.А

Актуальность проекта:

Давно существует спор, что средневековые крестьяне питались хуже, чем современные люди, поэтому голодали и умирали. Многие люди никогда не брали в руки книжку по истории, они могут только догадываться, не опираясь на факты.

Цель

проекта:

Выявить рацион средневековых крестьян и выяснить, правда ли, что они питались больше.

Задачи проекта

Introduction

Mercury is the closest planet to the Sun and the smallest one in the Solar System. The planet's name has nothing to do with the liquid metal since it was named after the Roman messenger god, Mercury
